Steinberg,2016-12-13 The classic reference work that provides annually updated information on the countries of the world Worlds of Common Sense Pauline Pepinsky,1994-09-21 This book explores the construction and maintenance of alternative worlds of common sense Employing a comparative approach Dr Pepinsky monitors events in Norway and the United States over several decades treating these countries as prototypes of societies that are classifiable as modern Western democracies but which exhibit marked contrasts in size and cultural homogeneity She examines the conditions under which different social realities are generated the assumptions that they presuppose and the practices that sustain them She then goes on to analyze the methods by which continuity is maintained and the grounds upon which changes are legitimized over time Pepinsky directs her book at an interdisciplinary audience She addresses problems of increasing concern in the social sciences and in the world at large Cultural differences in modal perspective affect the formulation of public policies and also contribute to intergroup tensions as interpersonal relations are simultaneously becoming intercultural encounters within many contemporary societies Researchers and students in social and cross cultural psychology ethnography sociology and political science will find this work of considerable interest **The Unmarried Mother and Her Child** Virginia

Wimperis,2024-11-15 Originally published in 1960 when every twentieth child in this country was born illegitimate every eighth was conceived outside marriage every fourth mother conceived her first born before her wedding day and among the children below school leaving age over half a million were illegitimate figures that were paralleled in many countries of Europe and the Commonwealth at the time Who are the parents of these children Why do they not marry How many of the fathers are known and how many of them know or help to maintain their children What legal pressure can be brought upon the parents and how easily can payment be evaded What assistance does the State or do the voluntary agencies give to these

young families here or in other countries As the children grow up what happens to them How many are adopted how many pass into public care and why How many appear before the courts What special personal difficulties do they have These and a host of other questions are fully explored for the first time in this book which at the time would be greeted with equal interest by social workers here and abroad and be the general reader The English problems are viewed in relation to the various solutions adopted by other countries and some of these the Russian German Norwegian Swedish and Danish are discussed at length The book contains two full length stories told by unmarried mothers one a nurse and the other a teacher in their own words From a very different world today this reissue can be read and understood in its historical context This book is a re issue originally published in 1960 The language used and views portrayed are a reflection of its era and no offence is meant by the Publishers to any reader by this re publication **Power and Privilege** Gerhard E.

Lenski,2013-04-01 Power and Privilege seeks to answer the central question of the field of social stratification Who gets what and why Using a dialectical view of the development of thought in the discipline Gerhard Lenski describes the outlines of an emerging synthesis of theories He shows that perspectives as diverse and contradictory as those of Marx Spencer Sumner Veblen Mosca Pareto Sorokin Parsons and Dahrendorf are parts of an evolving and systematic body of theory **Contesting**

Nordicness Jani Marjanen,Johan Strang,Mary Hilson,2021-12-20 The terms Nordic and Scandinavian are widely used to refer to the politics society and culture of Denmark Finland Iceland Norway and Sweden But why have people felt the need to frame things as Nordic and why has the adjective Nordic become so prominent This book adopts a rhetorical approach analysing the speech acts which have shaped the meanings of the term What do the different terms Nordic and Scandinavian have in common and how have the uses of these terms changed in different historical periods What accounts for the apparent upsurge in uses of the rhetoric of Nordicness in the 2010s Drawing on eight case studies of the uses of Nordic and Scandinavian from the nineteenth century to the present day the book explores the appeal and the flexibility of the rhetoric of Nordicness in relation to race openness gender equality food crime fiction Nordic co operation and the Nordic model Arguing that Nordic and Scandinavian are flexible and contested concepts that have been used in different often contradictory and inherently political ways the book suggests that the usage of the term has evolved from a means of creating a cultural community to forging political co operation and further to marketing models in politics and popular culture The rhetorical approach also shows how many of the hallmarks of Nordic political culture such as the Nordic model Nordic gender equality or Nordic openness are more recent conceptualisations than usually assumed As such the book argues for the need to turn attention away from analysing the different components of Nordicness into studying how when and for what purpose different features were made Nordic **The International Co-operative Alliance and the**

consumer co-operative movement in northern Europe, c. 1860-1939 Mary Hilson,2018-04-10 The book examines the history of co operation in the broad context of the history of consumerism and consumption of internationalism and the

development of international organisations and debates about international trade during the inter war period The fundamental question explored in the book concerns the meaning of co operation Was it a social movement or an economic enterprise Did it aspire to challenge capitalism or to reform it Did it contain at its heart a political vision for the transformation of society or was it simply a practical guide for organising a business Hilson argues that it was both but that an examination of the debates over the different meanings of co operation can also illuminate broader questions about the emergence of consumer interests in the first half of the twentieth century especially in a transnational context
