The Cambridge Companion to Christianity and the Environment Alexander J. B. Hampton, Douglas Hedley, 2022-08-04 Christianity has understood the environment as a gift to nurture and steward a book of divine revelation disclosing the divine mind a wild garden in need of cultivation and betterment and as a resource for the creation of a new Eden This Cambridge Companion details how Christianity one of the world's most important religions has shaped one of the existential issues of our age the environment Engaging with contemporary issues including gender traditional knowledge and enchantment it brings together the work of international scholars on the subject of Christianity and the Environment from a diversity of fields Together their work offers a comprehensive guide to the complex relationship between Christianity and the environment that moves beyond disciplinary boundaries To do this the volume explains the key concepts concerning Christianity and the environment outlines the historical development of this relationship from antiquity to the present and explores important contemporary issues

The Social Thought of Zygmunt Bauman K. Tester, 2004-05-28 Zygmunt Bauman is one of the most important contemporary social thinkers He has changed the way we think about the Holocaust postmodernity and globalisation This is the first book to discuss all of Bauman's work from the first essays in post Stalinist Poland through to his participation in 1960s Marxist revisionism and up to the work for which he is well known in the West Bauman's work is put into its social and historical context and it is shown why Bauman matters

Justice, Posterity, and the Environment Wilfred Beckerman, Joanna Pasek, 2001-05-03 In rich countries environmental problems are seen as problems of prosperity In poor countries they are seen as problems of poverty This is because the environmental problems in poor countries such as lack of clean drinking water are problems that affect them here and now whereas in rich countries the environmental problems that people worry about most are those that largely as a result of current prosperity and economic growth seem likely to harm mainly future generations But what exactly are our obligations to future generations Are these determined by their rights or intergenerational justice or equity or sustainable development The first part of the book argues that none of these concepts

provides any guidance but that we still have a moral obligation to take account of the interests that future generations will have And an appraisal of probable developments suggests that while environmental problems have to be taken seriously our main obligation to future generations is to bequeath to them a society in which there is greater respect for basic human rights than is the case today Furthermore generations are not homogeneous entities Resources devoted to environmental protection cannot be used for say health care or education or housing not to mention the urgent claims in poor countries for better food sanitation drinking water shelter and basic infrastructures to prevent or cure widespread disease It cannot serve the interests of justice if the burden of protecting the environment for the benefit of posterity is born mainly by poorer people today

Desolation and Enlightenment Ira Katznelson, 2020-10-13 During and especially after World War II a group of leading scholars who had been perilously close to the war's devastation joined others fortunate enough to have been protected by distance in an effort to redefine and reinvigorate liberal ideals for a radically new age Treating evil as an analytical category they sought to discover the sources of twentieth century horror and the potentialities of the modern state in the wake of desolation In the process they devised strikingly new ways to understand politics sociology and history that reverberate still In this major intellectual history Ira Katznelson examines the works of Hannah Arendt Robert Dahl Richard Hofstadter Harold Lasswell Charles Lindblom Karl Polanyi and David Truman detailing their engagement with the larger project of reclaiming the West's moral bearing In light of their epoch's calamities these intellectuals insisted that the tradition of Enlightenment thought required a new realism a good deal of renovation and much recommitment This array of historians political philosophers and social scientists understood that a simple reassertion of liberal modernism had been made radically insufficient by the enormities and moral catastrophes of war totalitarianism and the Holocaust Confronting dashed hopes for reason and knowledge they asked not just whether the Enlightenment should define modernity but also which Enlightenment we should wish to have

Wittgenstein and Levinas Bob Plant, 2005-02-16 Wittgenstein and Levinas examines the oft neglected relationship between the philosophies of two of the most important and notoriously difficult thinkers of the twentieth century By bringing the work of each philosopher to bear upon the other Plant navigates between the antagonistic intellectual traditions that they helped to share The central focus on the book is the complex yet illuminating interplay between a number of ethical religious themes in both Wittgenstein's mature thinking and Levinas's distinctive account of ethical responsibility

Dealing with Wars and Dictatorships Liora Israël, Guillaume Mouralis, 2013-12-02 Democratic transitions in Latin America Eastern Europe and South Africa often studied under the conceptual rubric of transitional justice have involved the formation of public policies toward the past that are multifaceted and often ambitious Recent scholarship rarely questions the concepts and categories transposed from one country to another This is true both in the language of political life and in the social sciences examining past oriented public policy especially policy toward ethnic cleansing and the line between the language of political practice legal analysis and scholarly discourse has been quite porous

This book examines how these phenomena have been described and understood by focusing recent processes such as the advent of international criminal justice in relation to previous postwar and recent purges. By crossing disciplinary approaches and periods, the authors pay attention to three main aspects: the legal or political concepts used and/or the ones mobilized in the academic work; the circulation of categories; know-how and arguments; the different levels that can shed light on transitions.

Power and Imagination Leonidas Donskis, 2008. Classical and modern literature often reveal more about the organized world's forms of power and authority structures than do works of political philosophy. What are the origins of political consciousness? How does our understanding of political power and its exercise originate in literature? Why do the early manifestations of political and religious tolerance appear in utopian literature rather than in philosophical treatises? Is it possible to do fictionally what others tend to do academically and theoretically? Exploring these questions allows Leonidas Donskis to analyze the relationship between power and imagination, politics and literature, and the principles of reality and imagination.

Being Poland Tamara Trojanowska, Joanna Niżyńska, Przemysław Czapliński, 2018-01-01. *Being Poland* offers a unique analysis of the cultural developments that took place in Poland after World War One, a period marked by Poland's return to independence. Conceived to address the lack of critical scholarship on Poland's cultural restoration, *Being Poland* illuminates the continuities, paradoxes, and contradictions of Poland's modern and contemporary cultural practices and challenges the narrative typically prescribed to Polish literature and film. Reflecting the radical changes, rifts, and restorations that swept through Poland in this period, Polish literature and film reveal a multitude of perspectives. Addressing romantic perceptions of the Polish immigrant, the politics of post-war cinema, poetry, and mass media, *Being Poland* is a comprehensive reference work written with the intention of exposing an international audience to the explosion of Polish literature and film that emerged in the twentieth century.
