French Student Uprising November 1967 June 1968:

The French Student Uprising, November 1967 - June 1968 Alain Schnapp, 1971 **The French Student Uprising, November 1967 - June 1968** Alain Schnapp, 1971 Jean-Jacques Lebel and French Happenings of the 1960s Laurel Jean Fredrickson, 2021-03-25 Combining a broad overview of Jean Jacques Lebel's coming of age among Surrealists and his rupture with the movement Laurel Jean Fredrickson focuses on two landmark happenings in this book the first Funeral of the Thing of Tinguely 1960 and the most scandalous 120 Minutes dedicated to the Divine Marquis 1966 This study illustrates the development and significance of French happenings in relation to cultural and political changes of the 1960s Research in Lebel's archives and others like the Archives nationale d'outre mer are indispensable in the telling of this extraordinary historical and theoretical narrative It illuminates sensitive often veiled dimensions of postwar French society from torture during the Algerian War to government censorship to the sexual politics of nudity in art This volume shows how Lebel synthesized the lessons of Dada and surrealism and 1960s experimentalism electrified by political radicalism to participate in shaping the erotics and forms of revolution in May 1968 **The American Politics of French Theory** Jason Demers, 2019-01-01 Working from the premise that May 68 is a shorthand that delimits an intensive decade of global revolt Jason Demers documents the cross pollination of French philosophy international activist movements and American countercultures From the assassinations of Martin Luther King Jr and George Jackson to the revolt at Columbia University the 1968 Democratic National Convention Woodstock and the Weather Underground Demers writes French theory into a constellation of American events and icons uncontained by national borders More than a compelling new take on the history of theory *The American Politics of French Theory* develops concepts gleaned from the work of Derrida Deleuze Guattari and Foucault providing new tools for thinking about translation theory and politics By recontextualizing French theory within a complex fabric of mass communication and global revolt Demers demonstrates why it is politically potent and methodologically necessary to think of translation associatively Political Crime in Europe Barton L. Ingraham, 2023-11-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979 **The One and the Many** Grant H. Kester, 2011-09-12 Examines questions of agency artisanship and identity in relation to collaborative art practice **Global Perspectives on Higher Education** Philip G. Altbach, 2016-04 The single best book on higher education as a global phenomenon Over the past half century globalization has had a profound impact on postsecondary education The twin forces of mass higher education and the global knowledge economy have driven an unprecedented transformation These fundamental changes have pulled in opposite directions one pushes for wider access and accompanying challenges of quality the other toward exclusive world class research oriented

universities In *Global Perspectives on Higher Education* renowned higher education scholar Philip G Altbach offers a wide ranging perspective on the implications of these key forces and explores how they influence academe everywhere Altbach begins with a discussion of the global trends that increasingly affect higher education including the implications of mass enrollments the logic of mass higher education systems around the world and specific challenges facing Brazil Russia India and China He considers the numerous implications of globalization including the worldwide use of the English language university cross border initiatives the role of research universities in developing countries the impact of the West on Asian universities and the expansion of private higher education Provocative and wide ranging *Global Perspectives on Higher Education* considers how the international exchange of ideas students and scholars has fundamentally altered higher education

Logics of Disintegration Peter Dews, 2020-05-05 Over the last two decades contemporary French philosophy has exercised a powerful influence on intellectual life across both Europe and America Post structuralist strategies and concepts have played an important role in many forms of social cultural and aesthetic analysis particularly on the Left Despite the widespread reception however there has still been comparatively little analysis of the basic philosophical assumptions of post structuralism or of the compatibility of many of its central tenets with the progressive political orientations with which it is frequently associated In this book Peter Dews seeks to remedy this situation by setting post structuralist thought in relation to another more explicitly critical tradition in the philosophical analysis of modernity that of the Frankfurt School from Adorno to Habermas *Logics of Disintegration* will be of interest to readers across a wide range of disciplines from literary criticism to social theory which have felt the impact of post structuralism and to anyone who wishes to reach a balanced assessment of one of the most influential intellectual currents of our time *The Publishers Weekly*, 1972

Italy from Crisis to Crisis Matthew Evangelista, 2017-12-01 *Italy from Crisis to Crisis* seeks to understand Italy's approach to crises by studying the country in regional international and comparative context Without assuming that the country is abnormal or unusually crisis prone the authors treat Italy as an example from which other countries might learn The book integrates the analysis of domestic politics and foreign policy including Italy's approach to military interventions energy security economic relations with the European Union EU and to the NATO alliance and covers a number of issues that normally receive little attention in studies of high politics such as information policy national identity immigration youth unemployment and family relations Finally it puts Italy in a comparative perspective with other European states naturally but also with Latin America and even the United States all countries that have experienced similar crises to Italy's and similar often populist responses This text will be of key interest to scholars and students of and courses on Italian politics and history European politics and more broadly comparative politics and democracy

Structuralism and the Logic of Dissent Eve Tavor Bannet, 1989-02-06 *Structuralism and the Logic of Dissent* is a fascinating and lucid exploration of the seminal writings of four eminent French structuralists that sheds new light on influential theoretical texts Eve Tavor Bannet discusses the

work of Barthes Derrida Foucault and Lacan as coherent philosophical fictions showing their contradictory political social and pedagogical implications and their complex historicity *Utopia and Dissent in West Germany* Mia Lee, 2019-01-22 Just as Chancellor Konrad Adenauer was seeking re election on a campaign of no experiments art avant garde groups in West Germany were reviving the utopian impulse to unite art and society *Utopia and Dissent in West Germany* examines these groups and their legacy Postwar artists built international as well as intergenerational networks such as Fluxus which was active in Düsseldorf Wiesbaden and Cologne and the Situationist International based in Paris These groups were committed to undoing the compartmentalization of everyday life and the isolation of the artist in society And as artists recast politics to address culture and everyday life they helped forge a path for the West German extraparlimentary left *Utopia and Dissent in West Germany* traces these connections and presents a chronological map of the networks that fed into the extraparlimentary left as well as a geographical map of increasing radicalism as the locus of action shifted to West Berlin These two maps show that in West Germany artists and their interventions in the structures of everyday life were a key starting point for challenging the postwar order **The Methods of the Gernet Classicists (RLE Myth)** Roland A. Champagne, 2015-03-05 The Gernet Centre was founded as a place where the structural method could be applied to the classics Structuralists attribute the survival origin and function of myths to common crosscultural factors they identify as structures As this book first published as *The Structuralists on Myth* in 1992 explains these structures are bundles of information not obvious either to the narrator or to the listener The bundles are collected features that reveal either the reasons for the survival of myths or their origins or their functions within their contexts The structuralists consider themselves to have talents as the collectors from myths of these bundles of information *Castoriadis, Foucault, and Autonomy* Marcela Tovar-Restrepo, 2012-03-29 This book examines Cornelius Castoriadis thought and the radical alternative it presents to the legacy of Michel Foucault focusing on three key notions that are central in both scholars theories the subject the production of social meaning and representation and social cultural change Castoriadis and Foucault faced similar theoretical and political challenges and tackled common questions yet their conclusions diverged significantly This important book establishes for the first time a critical dialogue between these two bodies of thought Through a detailed exploration of the Castoridian perspective Marcela Tovar Restrepo addresses the limitations of Foucault's poststructuralist thought exploring and comparing what those three central notions mean in each framework In so doing Tovar Restrepo elucidates a greater understanding of their differences and the resulting consequences for the social sciences and the role of social theory Ultimately this book presents Castoriadis philosophical and theoretical position as an alternative to unresolved poststructuralist problems and to what Castoriadis saw as a deterministic ontology embedded in political relativism paving the way for an invigorating debate about autonomy and social change *Forging Democracy* Geoff Eley, 2002-04-11 Democracy in Europe has been a recent phenomenon Only in the wake of World War II were democratic frameworks secured

and even then it was decades before democracy truly blanketed the continent Neither given nor granted democracy requires conflict often violent confrontations and challenges to the established political order In Europe Geoff Eley convincingly shows democracy did not evolve organically out of a natural consensus the achievement of prosperity or the negative cement of the Cold War Rather it was painstakingly crafted continually expanded and doggedly defended by varying constellations of socialist feminist Communist and other radical movements that originally blossomed in the later nineteenth century Parties of the Left championed democracy in the revolutionary crisis after World War I salvaged it against the threat of fascism and renewed its growth after 1945 They organized civil societies rooted in egalitarian ideals which came to form the very fiber of Europe s current democratic traditions The trajectories of European democracy and the history of the European Left are thus inextricably bound together Geoff Eley has given us the first truly comprehensive history of the European Left its successes and failures its high watermarks and its low tides its accomplishments insufficiencies and excesses and most importantly its formative lasting influence on the European political landscape At a time when the Left s influence and legitimacy are frequently called into question **Forging Democracy** passionately upholds its vital contribution **Fragments of Rationality** Lester Faigley, 2014-07-12 In an insightful assessment of the study and teaching of writing against the larger theoretical political and technological upheavals of the past thirty years *Fragments of Rationality* questions why composition studies has been less affected by postmodern theory than other humanities and social science disciplines *Art and Street Politics in the Global 1960s* William Marotti, 2023-04-28 Anarchic street performances in late 1950s Japan inauguration of the first Happenings in Antwerp and charging of the magic circle in Amsterdam Bauhaus Situationiste and anti national art exchanges networks and communes As Happener and Art Missionary Yoshio Nakajima s storied career traverses an astounding range of locations scenes movements media and performance modes in the global 1960s and 1970s in ways that challenge our notions of the possibilities of art Nakajima repeatedly plays a role in jump starting spaces of possibility from Tokyo to Ubbesbodø from Spui Square and the Dutch Provos to Antwerp and Sweden Despite this Nakajima s work has paradoxically been largely excluded from accounts where it might have justifiably featured The present volume represents an international collaboration of researchers working to remedy this oversight Nakajima s work demands a reconceptualization of narratives of this art and politics and their specific interrelation to consider his exemplary nonconformity and its exemplary exclusion This history demonstrates the inadequacy of notions of specificity that would oppose an authentic local or national frame to an inauthentic transnational one Conversely Nakajima manifests a key dimension of the 1960s as a global event in the interrelation between eventfulness itself and the redrawing of categories of practice and understanding *The Spirit of '68* Gerd-Rainer Horn, 2008-10-02 In virtually all corners of the Western world 1968 witnessed a highly unusual sequence of popular rebellions In Italy France Spain Vietnam the United States West Germany Czechoslovakia Mexico and elsewhere millions of individuals took matters into their own hands to counter imperialism capitalism autocracy bureaucracy and all

forms of hierarchical thinking Recent reinterpretations have sought to play down any real challenge to the socio political status quo in these events but Gerd Rainer Horn s book offers a spirited counterblast 1968 he argues opened up the possibility that economic and political elites on both sides of the Iron Curtain could be toppled from their position of unnatural superiority to make way for a new society where everyday people could for the first time become masters of their own destiny Furthermore Horn contends the moment of crisis and opportunity culminating in 1968 must be seen as part of a larger period of experimentation and revolt The ten years between 1956 and 1966 characterised above all by the flourishing of iconoclastic cultural rebellions can be regarded as a preparatory period which set the stage for the non conformist cum political revolts of the subsequent red decade 1966 1976 Horn s geographic centres of attention are Western Europe including the first full examination of Mediterranean revolts and North America He placed particular emphasis on cultural nonconformity the student movement working class rebellions the changing contours of the Left and the meaning of participatory democracy His book will make fascinating reading for anyone interested in this turbulent period and the fundamental changes that were wrought upon societies either side of the Atlantic The Risky Business of French Feminism

Jennifer L. Sweatman,2014-08-26 The Risky Business of French Feminism Publishing Politics and Artistry examines the institutional history of the publishing house Editions des Femmes as well as its relationship to the French Women s Liberation Movement MLF from 1972 to the present The founding and subsequent success of Editions des Femmes in the publishing milieu intensified the ideological divisions within the MLF and highlighted the extent to which that movement failed to adequately reflect on the power inherent in its recourse to print culture as an agent of change In particular Editions des Femmes produced several periodical publications and pioneered a woman centered subculture that attached militant political meanings to the practice of buying and publishing books While the MLF succeeded in changing legislation detrimental to women it was not able to create unified cultural politics or construct a long term media strategy that could preserve the movement s original ideals and unity Jennifer L Sweatman explores the long term dissipation of the MLF as a unified force not only as an outcome of ideological disagreement but also due to conflicting views on culture women s creativity as a strategy for empowerment and the utility of media for creating change As the MLF fragmented unable to fully come to terms with its various consumer identities its need for capital to support creative projects and its difficult experience with collective decision making the Editions des Femmes project was seen as incredibly controversial However Editions des Femmes embodied a broader strategy for cultural transformation that privileged women s creative works rather than feminism situating it as a successful forerunner of the revitalization of the publishing industry from below as small independent houses challenged the large media conglomerate control of the industry **Archaeology in the Making**

William L. Rathje,Michael Shanks,Christopher Witmore,2013 Archaeology in the Making is a collection of bold statements about archaeology its history how it works and why it is more important than ever This book comprises conversations about

archaeology among some of its notable contemporary figures. They delve deeply into the questions that have come to fascinate archaeologists over the last forty years or so: those that concern major events in human history such as the origins of agriculture and the state, and questions about the way archaeologists go about their work. Many of the conversations highlight quite intensely held personal insight into what motivates us to pursue archaeology; some may even be termed outrageous in the light they shed on the way archaeological institutions operate: excavation teams, professional associations, university departments. *Archaeology in the Making* is a unique document detailing the history of archaeology in the second half of the 20th century to the present day through the words of some of its key proponents. It will be invaluable for anybody who wants to understand the theory and practice of this ever-developing discipline.
