Building Educational Equity Indicator Systems National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Natalie Nielsen, 2020-06-17 How can states and schools use data to support their efforts to improve educational equity Building Educational Equity Indicator Systems A Guidebook for States and School Districts provides information to help state and school district leaders develop ways of tracking educational equity within their preK 12 systems The

guidebook expands on the indicators of educational equity identified in the 2019 National Academies report *Monitoring Educational Equity* showing education leaders how they can measure educational equity within their states and school districts. Some of the indicators focus on student outcomes such as kindergarten readiness or educational attainment while others focus on student access to opportunities and resources such as effective instruction and rigorous curriculum. Together the indicators provide a robust picture of the outcomes and opportunities that are central to educational equity from preK through grade 12. For each indicator of educational equity identified in the report the guidebook describes what leaders should measure and what data to use, provides examples of data collection instruments and offers considerations and challenges to keep in mind. The guidebook is meant to help education leaders catalogue data they already collect and identify new data sources to help them fill gaps.

Educational Equity Christopher Chapman, Mel Ainscow, 2021. Focusing on what can be done to promote equity within education systems, what the barriers to progress are and how these barriers might be overcome, this book provides detailed examples of strategies that have proved to be effective in addressing this challenge. Built on the work of the authors over the last three decades, the book presents an approach to educational change that will be relevant to different countries. The authors argue that there is untapped potential for promoting progress towards greater equity within schools and the communities they serve. They also show how this potential can be mobilised by using forms of collaborative action research to stimulate the development of more inclusive ways of working. Central to this approach is the use of evidence collected by practitioners with the support of university researchers drawing on the human resources that are there in every school. Grounded in research evidence and experience in the field, this book is ideal reading for a wide audience of practitioners and policy makers globally, including senior staff in schools as well as post graduate students, researchers and academics who are focusing on educational improvement.
