Sticks n' Stones... Improving Group Dynamics Through the Use of Cooperative and Leadership Games - an Integrated Approach Sandra Lauer, 2014-04-08 An action research project that includes an instructional model with activities On a small scale this work explored the variables which were contributing to a complete shutdown of a 5th grade class toward another member creating a marginalization of that child Using a three phase interdisciplinary strategy this class was coached on interpersonal skills in the classroom with journal writing and participated in supportive physical education activities The objective of this study was to develop an interdisciplinary educational program with a global perspective designed to help increase awareness of self and others provide for the development of effective communication and listening skills encourage the use of critical thinking and promote the development of leadership abilities through the use of cooperative and small group activities role playing and journal writing

Academic Motivation of Adolescents Tim Urdan, Frank Pajares, 2002-09-01 Few academic issues are of greater concern to teachers parents and school administrators than the academic motivation of the adolescents in their care There are good reasons for this concern Students who are academically motivated perform better in school value their schooling are future oriented in their academic pursuits and possess the academic confidence and positive feelings of self worth so necessary to increasing academic achievement Because academically motivated students engage their schoolwork with confidence and interest they are less likely to drop out of school suffer fewer disciplinary problems and prove resilient in the face of setbacks and obstacles It is precisely because academic motivation is so essential to academic achievement that motivation has taken a place along with cognition as one of the most followed lines of inquiry in educational psychology In this volume we are fortunate to gather together some of the most eminent scholars who have written extensively about the academic motivation of adolescents We are fortunate also in that they represent the varied theories and lines of inquiry that currently dominate research in this area In all we believe that in the dozen chapters that comprise this volume the authors provide elegant insights regarding the academic and social motivation of adolescents that will prove of interest to researchers students teachers school administrators parents policymakers and all others who play a pivotal role or are otherwise invested in the lives of adolescents in today's society It is our hope that these insights will not only further the conversation on adolescence and education but will serve as the impetus for further research capable of generating the creative ideas programs and structures so necessary to better the lives of the young people in our care

A Comparative Study of the Self-concept and Academic Achievement of Eight-year-olds in Open and Traditional Classrooms

Peggy Sheppard Mills,1978 *Introduction to Values Education* E. Palispis,1995 **Quality Circle Time in the Secondary School** Jenny Mosley, Marilyn Tew,2014-03-05 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company **Disruptive Pupil Management** Delwyn Tattum,2022-05-29 First published in 1986 Disruptive Pupil Management presents a comprehensive overview of the disruptive behaviour in schools in the light of the Elton Report The emphasis of this book is that a preventative approach to the problem is a more valid response than this crisis management approach which results in pupils being sent to special units The book therefore stresses the importance of schools managing their own techniques and interpersonal skills rather than schools importing solutions This book is a must read for all educationists teachers and researchers of primary and secondary education The Self Thomas M. Brinthaupt, Richard P. Lipka,1992-07-01 What are the characteristics and dimensions of the self Is there a best way to measure the self How does the researcher s definition of the self affect the choice of research measure and methods These are the questions addressed by this book Unlike previous books on the self this one provides a systematic analysis of the theoretical and methodological issues involved It offers a description of several alternative methods for studying the self and discussions of the advantages and disadvantages of these different approaches Emphasized here are the phenomenological and experiential nature of the self its multidimensionality and hierarchical structure and the relationship between defining and measuring the self Among the methodological issues addressed are the impact of significant others on the self the factors that affect the process of reporting about the self between group comparison of self structure the structure of the self in relationship to others and the effects of differing cultural contexts **A Social Psychology of Schooling** Colin Rogers,2017-09-14 If a theory of education is to be helpful to the practising teacher it must take the social context of learning into account Originally published in 1982 Colin Rogers does just this exploring the implications of two decades detailed research in to the social psychology of teaching and learning The central theme that emerges from this study is the importance of the still controversial teacher expectancy effect the effect of teachers expectations on the performance of pupils By examining in detail the claims made by those who believe that the expectations of teachers can influence levels of pupils academic attainment the book shows the complexity of interpersonal interaction and perception within the classroom and the nature of problems involved in studying these It also focuses on the way that the mutual perceptions of teachers and pupils themselves affect and are affected by other aspects of life in a school and extensive use is made of research conducted in British schools to illustrate major points The conclusion of the study was that it is the classroom the very environment in which teachers and pupils interact rather than teacher training that may need reform *Thinking and Learning Skills* J.
