**Curriculum Histories in Place, in Person, in Practice** Petra Hendry, Molly Quinn, Roland Mitchell, Jacqueline Bach, 2023-03-10 This book situates the Curriculum Theory Project at Louisiana State University within a larger historical framework of curriculum work examining the practices which have sustained this type of curricular vitality over the lifetime of the field's existence. Divided into seven parts, the authors illuminate seven practices which have sustained the scholarship: graduate programs, mentorship, and networking that have been critical to maintaining a web of international relationships. This exploration and coming together of intergenerational stories reveals a more complete and nuanced narrative of the development of curriculum theory over the last 60 years. Crucially, the project exemplifies the continuing resilience of curriculum theory despite ongoing neo-liberal aspirations to reframe education as a business. Reflecting upon the lived experiences and articulated memories of those who have participated in the project and analysis of documents collected over its 25-year history, it considers curriculum history in writing large through and from this lens of practice. As such, it opens up fresh insights for cultivating the vitality and vigor of curriculum theory more broadly on an international scale and with a view to future directions for the field. It will appeal to both new and experienced scholars working across education foundations, urban education, philosophy of education, and higher education, and researchers from across history, sociology, anthropology, ethnic studies, and gender studies.

Theories of Learning and Studies of Instructional Practice Timothy Koschmann, 2011-04-19 This is a book about an attempt to change the way math was taught in a particular classroom. Its title plays on our everyday usage of the terms theory and practice. In education, these terms are conventionally treated oppositionally: we have theories about what we should do, and we have what teachers actually do. In this way, theory stands prior, logically and chronologically, to practice; practice inevitably becoming theory's imperfect realization. We seek in this volume, however, to develop a different stance with regard to the relationship between the two. Taking the details of instructional practice as our principle object of study, we explore what role theories of learning might play in illuminating such practices. The book is about actual practices by which

teaching is done and how contemporary theories of learning might help us understand those practices It seeks to provide a foundation for future practice based inquiry in education by addressing the methodological question How do we go about studying instructional practice in a principled way
