beauty we have often overlooked the elusive charm and magic of certain landscapes A cloudy river flows into a verdant Arctic wetland where sandhill cranes and muskoxen dwell Further south cypress branches hang low over dismal swamps Places like these collectively known as swamplands or peatlands often go unnoticed for their ecological splendor They are as globally significant as rainforests and function as critical carbon sinks for addressing our climate crisis Yet because of their reputation as wastelands they are being systematically drained and degraded to make way for oilsands mines farms and electricity In *Swamplands* journalist Edward Struzik celebrates these wild places venturing into windswept bogs in Kauai and the last remnants of an ancient peatland in the Mojave Desert The secrets of the swamp aren't for the faint of heart Ed loses a shoe to an Arctic wolf and finds himself ankle deep in water during a lightning storm But the rewards are sweeter for the struggle an enchanting Calypso orchid an elusive yellow moth thought to be extinct ancient animals preserved in lifelike condition down to the fur *Swamplands* highlights the unappreciated struggle being waged to save peatlands by scientists conservationists and landowners around the world An ode to peaty landscapes in all their offbeat glory the book is also a demand for awareness of the myriad threats they face It urges us to see the beauty and importance in these least likely of places Our planet's survival might depend on it
