**The Edge of Race** Kalervo Gulson, Zeus Leonardo, David Gillborn, 2017-10-02 The phrase the edge of race can be used both as a description and as a response to two key concerns The first of these is that while race is increasingly on the periphery of education policy with a growing disregard shown for racist inequities as education systems become dominated by market driven concerns it is important that we map the shifting relations of race in neoliberal politics and policies The second concern is that at this time within and outside the spaces of the academy even to mention race equity is to risk condemnation marginalization and ridicule The authors in this collection use the edge of race as a provocation in order to examine the concepts methodologies policies politics processes and practices associated with race and racism in education The chapters offer empirical examples of the perpetuation and perniciousness of racism that point to the continued salience of research about race Additionally the chapters make contributions to conceptual and methodological understandings of race and racism The contributors illustrate the contingency productivity and fragility of race as a concept and point to how educational research continues to be a contested site in and from which to study race and education This book was originally published as a special issue of Discourse Studies in the Cultural Politics of Education
