The Publishers' Trade List Annual ,1987 *Process-Induced Chemical Changes in Food* Fereidoon Shahidi,Chi-Tang Ho,Nguyen Van Chuyen,2013-11-11 Chemical changes that occur in foods during processing and storage are manifold and might be both desirable and undesirable in nature While many of the processes are carried out intentionally there are also certain unwanted changes that naturally occur in food and might have to be controlled Therefore efforts are made to devise processing technologies in which desirable attributes of foods are retained and their deleterious effects are minimized While proteins lipids and carbohydrates are the main nutrients of food that are affected by processing it is their interaction with one another as well as involvement of low molecular weight constituents that affects their flavor color and overall acceptability Thus generation of aroma via thermal processing and bioconversion is of utmost importance in food preparation Furthermore processing operations must be optimized in order to eliminate or reduce the content of antinutrients that are present in foods and retain their bioactive components Therefore while novel processing technologies such as freezing irradiation microwaving high pressure treatment and fermentation might be employed control process conditions in a manner that both the desirable sensory attributes and wholesomeness of foods are safeguarded is essential Obviously methodologies should also be established to quantitate the changes that occur in foods as a result of processing This volume was developed from contributions provided by a group of internationally recognized lead scientists **The Lipid Handbook**

with CD-ROM Frank D. Gunstone,John L. Harwood,2007-03-13 Extensively revised reorganized and expanded the third edition of the industry standard The Lipid Handbook reflects many of the changes in lipid science and technology that have occurred in the last decade It places a stronger emphasis on the nutritional medical and agricultural aspects of lipids to reflect the increased interest and research in these areas in the past 10 years and beyond This edition features updated chapters and expanded coverage including additional compounds to its dictionary Written by experts from a diverse range of fields many of whom have contributed new research in the areas under review this handbook remains an essential reference

Soybeans Lawrence A. Johnson,Pamela J. White,Richard Galloway,2015-08-08 This comprehensive new soybean reference book disseminates key soybean information to drive success for soybeans via 23 concise chapters covering all aspects of soybeans from genetics breeding and quality to post harvest management marketing and utilization food and energy applications U S domestic versus foreign practices and production methods The most complete and authoritative book on soybeans Features internationally recognized authors in the 21 chapter book Offers sufficient depth to meet the needs of experts in the subject matter as well as individuals with basic knowledge of the topic **Fats in Food Products** D. P.

Moran,2012-12-06 The properties of fats and the characteristics of some food products based on fats have been documented in several books Individual fats such as milkfat however have received less attention despite many successful initiatives to increase their utilization in food products Moreover the availability of data on the function of fats in the context of major manufactured food products has often been constrained by the general reluctance of manufacturers to disclose details of working practices In some areas such as yellow fat spreads the market has changed dramatically over the last decade or so by the introduction of a broad class of new products resulting from a trend among consumers in the developed world towards reduced fat consumption A review of this general area therefore now seems very timely In the preparation of this book we have been fortunate to have had the support of internationally recognised specialists with much relevant experience and achievement in their subject areas We believe that their contributions not only subscribe to the main aim of this book by providing useful insight into the functional properties of the major fats in foods but also offer information concerning recent and novel methods of processing these fats Opportunities for possible future developments are indicated throughout

Advances in Lipid Methodology R O Adlof,2003-10-01 The fifth volume in the Advances in lipid methodology series is the first with new editor Richard O Adlof but its objectives are still those of the previous editor William W Christie To provide readable up to date reviews of rapidly expanding areas of lipid analysis and practical examples which should be of immediate use to lipid analysts As in the previous volumes of Advances in lipid methodology the editor has chosen leading international experts to write individual chapters Volume 5 contains four chapters on specific methodologies of lipid analysis and three which describe specific applications or standardization of methods The methodologies are different scanning calorimetry for the study of physical properties of fats and oils silver ion chromatography atmospheric pressure chemical ionization mass spectrometry APCI MS and supercritical fluid chromatography SFC Chapters on specific applications cover the analysis of genetically modified oils and the use of fatty acid profiling in the characterization of metabolic diseases A further chapter provides an overview of the official standard methods used for fats and oils analysis and gives extensive listings of information on standards organizations **Edible Oil Processing from a Patent Perspective** Albert J.

Dijkstra,2012-10-02 Patent literature has always been a mine of information but until recently it was difficult to access Now with the Internet access to all patent documents is almost instantaneous and free However interpreting the technical information provided by patent literature requires a certain skill This monograph aims to provide that skill by explaining patent jargon and providing background information on patenting Patents dealing with edible oil processing are used to explain various aspects of patenting To make the explanations less impersonal some have been larded with personal remarks and experiences Accordingly this monograph is intended for scientists and engineers dealing with edible oils and fats who want to extend their sources of technical information Hopefully it will inspire them to innovate help them to avoid duplication and provide them with some amusement Marine Fisheries Review ,1977
