Education in Indonesia Daniel Suryadarma,Gavin W. Jones,2013 In Indonesia as elsewhere in Asia education will inevitably play a key role in the national development experience as the twenty first century unfolds Not much international attention is paid to how the education sector is faring in Indonesia but that is not because nothing is happening The past decade has seen major changes in the structure of the education system and in the schooling trajectories of Indonesian children and adolescents The administration of primary and secondary education has been decentralized to the regions A new paradigm of school based management has been introduced Public spending on education has finally reached one fifth of total government spending as required by law But although enrolment rates at all levels continue to increase the quality of education remains low and has not improved and the tertiary sector continues to experience problems of autonomy and unsatisfactory performance

Transformative Change and Real Utopias in Early Childhood Education Peter Moss, 2014-04-24 Early childhood education and care is a major policy issue for national governments and international organisations This book contests two stories both infused by neoliberal thinking that dominate early childhood policy making today the story of quality and high returns and the story of markets stories that promise high returns on investment if only the right technologies are applied to children and the perfection of a system based on competition and individual choice But there are alternative stories and this book tells one a story of democracy experimentation and potentiality in which early childhood centres are public spaces and public resources places where democracy and experimentation are fundamental values community workshops for realising the potentiality of citizens This story calls for transformative change but offers a real utopia both viable and achievable The book discusses some of the conditions needed for the story s enactment and shows what it means in practice in a chapter about project work contributed by a Swedish preschool teacher Critical but hopeful this book is an important contribution to resisting the dictatorship of no alternative and renewing a democratic politics of

early childhood education It is essential reading for students and teachers researchers and other academics and for all other concerned citizens **American Journal of Education** ,1907
