This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course specific perspective offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The AEC will support the ASEAN's transformation into a region that guarantees free movement of goods, services, capital and skilled labor. This will make ASEAN an even more dynamic and competitive region. In preparation for the AEC, the ASEAN member countries have ventured to improve the comparability and connectivity of their TVET systems. As an important component of human resources development, TVET is expected to play an active role in preparing the successful EAC. The implications of technological, economic and social trends are intervening factors that refine pedagogical strategies leading to the molding of TVET as a more effective platform to catalyze pragmatic approaches to prepare the workforce for the new imperatives of the world of work. Regional integration and harmonization of TVET in the region have become key concerns and at the same time
