Impact of Migration on Income Levels in Advanced Economies Ms. Florence Jaumotte, Ksenia Koloskova, Ms. Sweta Chaman Saxena, 2016-10-24 The recent refugee surge has brought attention to the macro critical policy issue of migration including speculations that migration can be an unfavorable phenomenon for the receiving economies A careful examination of the impact of migration on host economies is thus critical Focusing on the economic impact most of the academic discussion has centered on the effect of migration on labor markets and public finances Much less is known about the long term impact of immigration on the GDP per capita or the standard of living of host economies This note makes three contributions to estimating this impact it uses a restricted sample of advanced economies rather than a mixed sample of higher and lower income host countries it examines whether the GDP per capita impact varies for different skill levels of migrants and it goes beyond the aggregate impact of migration on GDP per capita to examine how broadly gains in this regard are shared across the population In particular it examines whether migration impacts the income levels of those both at the top and at the bottom of the earnings distribution or whether gains are instead concentrated in a small group of high earners It finds that immigration significantly increases GDP per capita in advanced economies that both high and lower skilled migrants can raise labor productivity and that an increase in the migrant share benefits the average income per capita of both the bottom 90 percent and the top 10 percent of earners suggesting the gains from immigration are broadly shared

Strategies for Increasing Productive Employment in Developing Countries with Special Reference to Sierra Leone Dr. Ibrahim B.S. Sesay, 2014-12-08 This book as pointed out by Professor Singer in his preface discussed divergent development problems facing developing

countries Participants of the seminar from various African countries brought in case studies from their own countries as comparison with the Kenya case study where the seminar was held As a result of this comparative study field trips were organized by the seminar authorities In view of these facts and experiences gained from this seminar I was sufficiently stimulated for my task to write this book based on similar lines but with special reference to Sierra Leone My past experiences as a Labor Officer in the Ministry of Labor in Sierra Leone have in no small way also contributed to the success of the completion of this book for industrial relations readers to have interest in it On joining the Personnel and Administration Department of the Standard Bank I was moved to incorporate in my book a chapter on the role of banking particularly the role of Standard Bank formerly known as the British Bank of West Africa in Sierra Leone Readers will also find it in one of the chapters current economic development taking place in Africa particularly regional groupings for example the Mano River Union between Sierra Leone Guinea and Liberia and The Economic Community of West African States ECOWAS and the now defunct East African Economic Community For this reason this book will be of tremendous use to planners and economists bankers industrialists teachers and various people from all walks of life concerned with the development of their countries but it is more particularly useful to Sierra Leoneans because of the many references related to Sierra Leone
