The Aesthetic Dimensions of Educational Administration & Leadership Eugenie A. Samier, Richard Bates, 2006-11-22 The question of aesthetics as a theoretical framework for thinking about modern leadership issues in educational settings is an emergent area of inquiry that is receiving considerable attention There is a growing sense that the mechanistic approach to leadership which has been widely encouraged over the last ten years is sterile and that a more philosophical approach is now required This approach is covered here taking into account the importance of aesthetics on all aspects of the administrative and leadership world the ways ideas and ideals are created how their expression is conveyed the impact they have on interpersonal relationships and the organisational environment that carries and reinforces them and the moral boundaries or limits that can be established or exceeded While presenting a significant departure from conventional studies in the field the international contributors reflect a continuity of thought on administrative and

redistribution of decision making authority to stimulate and sustain improvements in a school. For this purpose, varying degrees of formal authority to make decisions in the domains of school's mission, goals, priorities, and school policies relating to financial, material, and human resources are not simply delegated but transferred by legislation to a representative governing body called the school council or board. Accordingly, it is the position of the principal or the head teacher, previously at the apex of the hierarchical structure of the school, which undergoes the most radical reform. Under the new concept, authority is shifted to the corporate body that is to the council or board, while the principal becomes an ex officio member of that body and the chief executive officer (CEO) of the school. Traditionally and legally, the principal or the head teacher was vested with the full authority for the total management of the school. But in terms of SGS or SBM, the principal becomes a partner with the representatives of other relevant stakeholders in a democratic structure. When the bureaucratic model of a school gets modified with the school governing body occupying the apex of the school hierarchy, it becomes the key power centre with legal authority.

Policy, Leadership and Professional Knowledge in Education Michael Strain, Dr William F Dennison, Dr Janet Ouston, Dr Valerie Hall, 1998-11-25. For those who want to wallow in the past, this is a comfortable book that sets one's own experiences in context. For those who will still be working into the next century, here are the issues we must face as leaders. For those PhD and EdD students seeking topics to research, there are all the controversial issues here that still need investigation, and it has a stunning list of references, a roll call of all the great and the good in the last 25 years of educational administration. **International Studies in Educational Administration**. The book is a challenge to everyone concerned with the present and future state of public education in the UK and the rest of the developed world. The issues are of special concern to those who are expected to provide leadership in schools and colleges and for those with public and political responsibilities. How should our conception of learning and its contribution to a Learning Society be defined? How can education and other aspects of social care and nurturing enhance our lives as people, irrespective of our performance capabilities? What is the role of teachers who also manage learning? This book contributes formatively to current debate. What can educationists do about the discontinuous changes which threaten parents and professionals alike? Must education submit to the stranglehold of economic rationalism? It is hoped that this book will assist all those working to promote education's humane and learning aspirations in society.

The Life and Work of Teachers Christopher Day, Alicia Fernandez, Trond E. Hauge, Jorunn Muller, 2005-06-23. Contributors from around the world tackle the factors that have the greatest impact on creating quality learning opportunities for students, namely policy, school leadership, and teaching teachers' lives. Drawing on a range of critical, conceptual, and empirical perspectives, the contributions illustrate the extent to which experience can be similar around the world. The book sheds much needed light on the effects of mandated change upon school leaders and teachers, both nationally and internationally. It also demonstrates how teachers have coped or flourished, both because and in spite of the changing circumstances they work under.
