Along the lines of the book of Ruth, she develops a Bible didactical theory for her own church. At the same time, the book will also give Western readers an insight into one of the major Presbyterian denominations in Korea, little known so far.

researchers and educators seeking the latest research on student learning and instructional design Values Education and Quality Teaching Terence Lovat, Ron Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values neutrality In fact those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment Part of the pragmatism was in convincing those whose main experience of education had been through some form of church based education that state based education was capable of meeting the same ends Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education Beyond the standard goals of literacy and numeracy education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon to be new nation As an instance the NSW Public Instruction Act of 1880 cf NSW 1912 under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society including understanding the role that religious values had played in forming that society's legal codes and social ethics The notion therefore that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision The evidence suggests that public education's initial conception was of being the complete educator not only of young people's minds but of their inner character as well

Practitioner Research In The Primary School Rosemary Webb,2013-10-28 First Published in 1990 Central to the vision of teachers researching their own practice was the belief that the improvement of teaching and learning in schools could best be achieved through the development of the critical and creative powers of individual teachers The research

studies in this book which reflect and extend that vision serve as accounts of the learning experiences of a group of practitioner researchers. The book has two closely interrelated purposes. The first is to provide information and ideas on the areas of the formal and hidden curriculum into which the practitioners enquired. The second purpose is to provide methodological ideas and assistance for those already engaged in practitioner research and to motivate others to seek an opportunity to undertake some form of research based enquiry. The two purposes are closely interrelated because of the value the contributors ascribe to taking a research stance to teaching.
