Christopher P. **Transforming Agricultural Education for a Changing World** National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Board on Agriculture and Natural Resources, Committee on a Leadership Summit to Effect Change in Teaching and Learning, 2009-11-16 During the next ten years colleges of agriculture will be challenged to transform their role in higher education and their relationship to the evolving global food and agricultural enterprise If successful agriculture colleges will emerge as an important venue for scholars and stakeholders to address some of the most complex and urgent problems facing society Such a transformation could reestablish and sustain the historical position of the college of agriculture as a cornerstone institution in academe but for that to occur a rapid and concerted effort by our higher education system is needed to shape their academic focus around the reality of issues that define the world's systems of food and agriculture and to refashion the way in which they foster knowledge of those complex systems in their students Although there is no single approach to transforming agricultural education a commitment to change is imperative

**John Dewey, Liang Shuming, and China's Education Reform** Huajun Zhang, 2013-04-19 This book explores the central question of how to cultivate a continued sense of self in the radically changing Chinese society a question that is highly related to the current ongoing educational reform If education cannot respond to the problem of students disconnection from the changing society learning cannot truly happen in school and the reform will fail Zhang suggests a philosophy of education that highlights the cultivation of students unique but inclusive individuality so that students learn how to nurture their own mind in this profoundly changing society rather than becoming empty and lost The discussion of this proposed question is inspired by the thoughts of the American pragmatist John Dewey and Chinese Confucian scholar Liang Shuming It is not the author's intention to have a pure philosophical discussion but rather to refer to their philosophies to help answer the practical question of cultivating individuality in an educational setting during this period of China's modern transition
