Ecological Research To Promote Social Change Methodological Advances From Community Psychology:

Ecological Research to Promote Social Change Tracey A. Revenson, Anthony R. D'Augelli, Sabine E. French, Diane Hughes, David E. Livert, Edward Seidman, Marybeth Shinn, Hirokazu Yoshikawa, 2012-12-06 During the past quarter century community psychologists have worked to make relevant contributions to human welfare in community settings and to effect social change Working with and in schools neighborhood organizations religious institutions social programs and government agencies the community psychologist has come to understand how social settings and social policy influence behavior and foster change that promotes individual health and well being Using a social ecological paradigm as their guiding framework they focus on the interactions between persons and their environments cultural diversity and local empowerment for understanding organizational community and social change Community psychologists have relied on multiple methods of obtaining data but more often they have had to develop new methodologies or adapt existing ones These innovative methods have been recorded in the American Journal of Community Psychology throughout the years of its history and have changed the way that researchers in the field have gathered data

Critical Community Psychology Carolyn Kagan, Mark R. Burton, Paul Duckett, Rebecca Lawthom, Asiya Siddiquee, 2011-05-23 Interest in community psychology and its potential has grown in parallel with changes in welfare and governmental priorities Critical Community Psychology provides students of different community based professions working in a range of applied settings at both undergraduate and postgraduate levels with a text which will underpin their community psychological work Key Features Clear learning objectives and chapter contents outlined at the start of each chapter Key terms highlighted with definitions either as marginal notes or in chapter glossaries Case examples of community psychology in action Each chapter ends with a critical assessment section Discussion points and ideas for exercises that can be undertaken by the reader in order to extend critical understanding Lists of further resources e g reading film electronic Authors are members of the largest community psychology departmental team in Europe

Community Psychology John Moritsugu, Elizabeth Vera, Frank Y Wong, Karen Grover Duffy, 2015-07-22 Community Psychology 5 e focuses on the prevention of problems the promotion of well being empowerment of members within a community the appreciation of diversity and an ecological model for the understanding of human behavior Attention is paid to both classic early writings and the most recent journal articles and reviews by today's practitioners and researchers Historical and alternative methods of effecting social change are explored in this book with the overall theme that the environment is as important as the individual in it This text is available in a variety of formats digital and print Learning Goals Upon completing this book readers will be able to Understand the historical and contemporary principles of community psychology Apply theory and research to social services mental health health legal and public health systems

A Quarter Century of Community Psychology Tracey A. Revenson, Anthony R. D'Augelli, Sabine E. French, Diane Hughes, David E. Livert, Edward Seidman, Marybeth Shinn, Hirokazu Yoshikawa, 2011-06-27 This work contains original research from the first

25 years of the American Journal of Community Psychology selected to reflect community psychology's rich tradition of theory, empirical research, action, and innovative methods. This volume will be of interest to community mental health workers, social science and social work researchers, health care professionals, policymakers, and educators in the fields of community and preventative psychology. International Community Psychology Stephanie Reich, Manuel Riemer, Isaac Prilleltensky, Maritza Montero, 2007-07-03. Community psychology (CP) has a rich history and presence internationally that many people may not be aware of. Today's increasingly global environment encourages reviewing the world-wide goals and practices of CP. The desire to promote collective well-being clearly transcends geographical boundaries. The goal of developing a global perspective and discourse between countries has been delayed by the lack of a single accessible source for information. This book provides the first in-depth guide to global community psychology research and practice history and development theories and innovations presented in one field-defining volume. Included are contributions from countries with long histories of oppression, social movements, and political turmoil; long-time democracies and former dictatorships. Fully formed CP establishments compare with fledgling ventures into the field. The contributors document the complex relationships between CP and ideological currents, other strands of psychology, and social science, cultural, and historical traditions and economic developments. The goals of this book are several: Promote international collaboration, enhance theory utilization and development, identify biases and barriers in the field, accrue critical mass for a discipline that is often marginalized, minimize the pervasive US-centric view of the field. Practitioners and researchers will find in International Community Psychology new perspectives on the communities they serve. As a text for advanced and graduate-level courses, it depicts a robust field with a legitimate mission. When concepts of community and sometimes even of psychology may not always translate from one nation to the next, this book provides a world of needed context. **Ethical Transformations for a Sustainable Future** Deva Temple, 2017-09-29. It has become increasingly apparent that humanity's complex social, political, and economic systems are incompatible with the finite capacity of the Earth to replenish resources and absorb wastes. If the planet is to continue to be habitable for the myriad web of other creatures that make life possible, humans must transform their systems so that they are aligned with natural systems. One thing is sure: it will not be Nature's laws, the delicate interdependence that characterizes Earth's ecosystems, that change. The change must begin within each person and from there permeate throughout our social, political, and economic structures. The contributors to this volume believe that such transformations are urgently needed and possible, and they offer specific examples. They suggest solutions that call for new perspectives in our ethics, beliefs, traditions, economy, business, gender relations, education, and technology. They show that human beings have the power to implement changes in all natural and social environments. The chapters in this book have been organized around three keywords: Reconnecting, Reframing, and Rethinking. The contributors argue that we need to reconnect with the Earth and nature as well as with each other and parts of ourselves that we have ignored for too long. We

need to reframe the way in which people prioritize choices in the economy the way we do business and pursue development and we need to rethink the mission of education and the roles of technology

Diversity and Developmental Science

Dawn P. Witherspoon, Gabriela Livas Stein, 2023-01-30 This book examines the challenges faced by developmental scientists as the population under the age of 18 in the United States has become a majority minority with no racial ethnic group having a numeric majority The volume tackles how these demographic shifts compel scientists to consider the unique and universal processes that promote the growth thriving and resilience of these populations across this new landscape and also takes into account systems of oppression power privilege racial justice and structural disadvantage It describes the challenges of conducting research with diverse populations and offers practical methodological solutions The book provides an overview of the current demographic shifts and their implications for developmental researchers It examines key diversity science constructs that need to be considered for all developmental research within this new global context in which societies are becoming more diverse In particular chapters address how to measure and conceptualize these constructs using within group designs as well as research that includes youth from multiple backgrounds In addition the volume focuses on the contexts that shape the developmental trajectories of youth and how best to capture these contexts with an eye toward diversity science Key areas of coverage include Identifying best practices in the conceptualization and measurement of race and ethnicity in developmental science at the individual and contextual levels Stimulating a dialogue that translates to an actionable agenda designed to tackle issues of conceptualization and measurement of key constructs associated with race ethnicity Leading edge strategies for building interdisciplinary teams to conduct ethical and responsible work with diverse populations that include scholars of color Finally the book addresses translational work including how the incorporation of diversity science can influence policy and help build collaborative research teams that are well poised to conduct ethical research in these diverse populations The volume provides recommendations for researchers to incorporate diversity science into their work This book is a must have resource for researchers professors clinicians therapists and other professionals as well as graduate students in developmental clinical child and school psychology public health ethnic studies counseling anthropology African American Black Studies Latinx Latino Chicano Studies and Asian American Studies

Bel,2025-09-30 International professional neuroscience organizations granting agencies and academic institutions have pledged their commitment to enhance diversity equity and inclusion with public statements of support and promises to increase training and funding opportunities for underrepresented scientists At the same time there is growing recognition that many human neuroscience studies to date have had insufficient representation of the rich tapestry of diversity across the globe resulting in demographically skewed samples upon which significant medical protocols pharmacological dosing recommendations and governmental policies have been shaped Finally much of the inquiry and analyses of potential variance across diverse groups in the neurosciences has taken a hegemonic view with little attention to the structurally racist biased and or colonialist systems of oppression that are likely to undergird these potential variances As we move into the next decade of neuroscience research there is an urgent need to more equitably cite and include the voices of diverse cross disciplinary health equity researchers who can bring their decades long expertise to enhance our perspectives of justice equity diversity and inclusion in human neuroscience neuropharmacology computational neuroscience developmental neuroscience neurogenetics and neuroinformatic inquiries
