Ecology And Management Of Grazing Systems:

The Ecology and Management of Grazing Systems John Hodgson, Andrew W. Illius, 1996 The understanding and management of land resources used by grazing animals are of major importance to ecologists and agricultural and environmental scientists This book fills a major gap in the market by synthesising a range of perspectives on grazing systems drawn from plant science animal science and ecology It outlines the principles of herbage growth and competition of animal nutrition and grazing behavior and of the interactions of plant and animal factors that are central to an understanding of grazing systems Chapters on the management of grazing systems cover both intensive and extensive systems including rangelands from all major agroecological zones of the world The book is written by leading authorities from the USA UK Australia New Zealand South Africa Israel and France It represents a major contribution to the literature for advanced students and research workers concerned with plant science especially grasslands animal science especially ruminants and natural and agricultural ecosystems

Rangeland Ecology And Management Harold Heady, R. Dennis Child, 1999-11-11 Over the last two decades the science of range management like many other resource disciplines has embraced and integrated environmental concerns in the field the laboratory and policy Rangeland *Proceedings-Symposium on Ecology and Management of Riparian Shrub Communities*, 1992 *Proceedings: Symposium on Ecology and Management of Riparian Shrub Communities, Sun Valley, ID* Anne F. Ecology and Management of Neotropical Migratory Birds Deborah M. Finch, Thomas E. Martin, 1995 The apparent decline in numbers among many species of migratory songbirds is a timely subject in conservation biology particularly for ornithologists ecologists and wildlife managers This book presents a full discussion of the problem

Ecological Management of Agricultural Weeds Matt Liebman, Charles L. Mohler, Charles P. Staver, 2001-07-19 Concerns over environmental and human health impacts of conventional weed management practices herbicide resistance in weeds and rising costs of crop production and protection have led agricultural producers and scientists in many countries to seek strategies that take greater advantage of ecological processes and thereby allow a reduction in herbicide use This book provides principles and practices for ecologically based weed management in a wide range of temperate and tropical farming systems After examining weed life histories and processes determining the assembly of weed communities the authors describe how tillage and cultivation practices manipulations of soil conditions competitive cultivars crop diversification grazing livestock arthropod and microbial biocontrol agents and other factors can be used to reduce weed germination growth competitive ability reproduction and dispersal Special attention is given to the evolutionary challenges that weeds pose and the roles that farmers can play in the development of new weed management strategies *Rangeland Ecology & Management*, 2005
