## **Ecology Justice And Christian Faith A Critical Guide To The Literature:**

**Ecology, Justice, and Christian Faith** Peter W. Bakken, Joan G. Engel, J. Ronald Engel, 1995-11-30 The first comprehensive and critical overview of Christian perspectives on the relationship between social justice and ecological integrity this annotated bibliography focuses on works that include ecological issues social ethical values and problems and explicitly theological or religious reflection on ecological and social ethics and their interrelations This body of moral reflection on the relationship between ecological ethics and social and economic justice sometimes called eco justice will be of interest to those involved in religious education research liturgical renewal public policy recommendations community action lay witness and personal life style transformation The work is comprised of an introductory review essay followed by over 500 complete annotations As a contemporary subject much has been written in the past 30 years about the Christian approaches to the relationship between ecological integrity and social justice The literature comes from a variety of disciplines and perspectives from biblical studies to philosophical theology and cultural criticism and from evangelical theory to process feminist and creation centered theologies Although there have been significant movements and developments in this literature much writing seems unaware of other or earlier discussions of the interrelationships This volume brings all the works together

*Christianity and Ecological Theology* E. M. Conradie, 2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa

*The Integrated Protestant Ethic and the Spirit of Environmentalism* S. Steiner-Aeschliman, 1999 The theory and data of environmental science suggest that growth in rates of population consumption and environmental degradation as a result of the activities of industrialized societies has created an ecological crisis to which modern societies must adapt However adaptation is problematic Max Weber studied adaptive social change during the industrial revolution The evolution of this new way of life was initially problematic because individuals who established industrialism were socialized under feudalism In this dissertation I consider The Protestant Ethic and the Spirit of Capitalism as a theoretical treatise framed by modern human ecology in order to study social change in the context of the ecological crisis of industrialism The Protestant Ethic is known for describing how religious ideas influenced the unfolding of modern capitalism in the West However there is nothing inherent in Protestantism that requires linkage to industrialism I argue that Protestantism has evolved and that it need not necessarily promote environmental exploitation although under industrialism it has I identify a green subculture within Protestantism and consider how Protestantism's weakness may also be its strength The very sociological structure that in the absence of ecologically realistic norms permits widespread ecosystem degradation by industrial capitalism may also generate ecologically realistic norms for a natural capitalism Weber

contended that rationality was problematic because it paradoxically results in a dual crisis of management and meaning where human agency becomes imprisoned as if in an iron cage The irrational continuation of environmentally degrading social practices eventually contributes to a legitimation crisis People turn to religion as an alternative authority If science and religion converge on environmental values they might catalyze social change unless they are too distorted by ideological bias Adaptive social change only occurs if ethical and ecological values are in accordance with the sustainability of ecosystems Hence to adapt to the ecological crisis sociocultural systems require socialization into ecological realism because ecologically rational societies may still be maladaptively organized around environmentally unsustainable trajectories

*T&T Clark Handbook of Edward Schillebeeckx* Stephan van Erp, Daniel Minch, 2019-09-05 Written by leading experts on both the thought of Edward Schillebeeckx and modern theology this handbook offers the first comprehensive study of the historical philosophical political and theological aspects of Schillebeeckx's work As one of the most influential Catholic theologians of the twentieth century he played a key role in the preparations for the theological revolution of the Second Vatican Council and the debates of the post conciliar era His engagement with critical theory hermeneutics and biblical scholarship culminated in his groundbreaking Christological trilogy which marked Schillebeeckx as one of the most significant and innovative thinkers of his time By building an overview of recent research into Schillebeeckx's writing the contributors shed new light on his influence and ongoing relevance in contemporary theology Beginning with the roots of Schillebeeckx's views on metaphysics spirituality and faith the essays then move to his work during and after the Second Vatican Council and then to his engagement with new directions in philosophy and his renewal of classical topics such as creation theological and soteriological anthropology and eschatology Culminating with an analysis of theology and culture this handbook thoroughly explores the implications of Schillebeeckx's theology for a contemporary readership

*Encyclopedia of Religion and Nature* Bron Taylor, Jeffrey Kaplan, 2005-01-01 No Marketing Blurb      **Eco-Justice--The Unfinished Journey** William E. Gibson, 2012-02-01 Eco Justice The Unfinished Journey links ecological sustainability and social justice from an ethical and often theological perspective Eco justice defined as the well being of all humankind on a thriving earth began as a movement during the 1970s responding to massive sobering evidence that nature imposes limits limits to production and consumption with profound implications for distributive justice and limits to the human numbers sustainable by habitat earth This collection includes contributions from the leading interpreters of the eco justice movement as it recounts the evolution of the Eco Justice Project initiated by campus ministries in Rochester and Ithaca New York Most of these essays were originally published in the organization's journal and they address many themes including environmental justice hunger economics and lifestyle      **Ecologies of Grace** Willis Jenkins, 2013-02-12 Christianity struggles to show how living on earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In

Ecologies of Grace Willis Jenkins presents a field shaping introduction to Christian environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics He then uses this new map to explore afresh the ecological dimensions of Christian theology Jenkins first shows how Christian ethics uniquely frames environmental issues and then how those approaches both challenge and reinhabit theological traditions He identifies three major strategies for making environmental problems intelligible to Christian moral experience Each one draws on a distinct pattern of grace as it adapts a secular approach to environmental ethics The strategies of ecojustice stewardship and ecological spirituality make environments matter for Christian experience by drawing on patterns of sanctification redemption and deification He then confronts the problems of each of these strategies through critical reappraisals of Thomas Aquinas Karl Barth and Sergei Bulgakov Each represents a soteriological tradition which Jenkins explores as an ecology of grace letting environmental questions guide investigation into how nature becomes significant for Christian experience By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal
