Asia Central. Análisis geopolítico de una región clave Mohamed El Yattioui, Claudia Barona, 2022-04-18
Casi treinta años después de la caída de la URSS, Asia Central sigue siendo una de las regiones más olvidadas del planeta. Sin embargo, su relevancia está creciendo debido a su importancia energética y estratégica desde el 11 de septiembre de 2001 y el ataque estadounidense contra los talibanes en Afganistán un mes después. Desde entonces, estadounidenses, rusos y chinos han querido influir en la región que alberga una gran importancia geopolítica a partir de su tamaño y posición geográfica. Recursos naturales y el papel que juegan diversos países dentro de ella. Con ello, Asia Central se ha convertido en un espacio con una importancia indiscutible en el plano tanto regional como internacional por lo cual su estudio resulta esencial en la actualidad. Esta obra analiza cómo las potencias intentan definir sus relaciones con los cinco países de Asia Central y de esta manera ofrece una visión geopolítica contemporánea sobre una región importante por su geografía y sus recursos.

Multinacionales españolas en un mundo global y multipolar Ramón Casilda Béjar, 2011
Bancos y empresas españolas durante la última década del siglo XX tras su expansión vertiginosa en América Latina se convirtieron en multinacionales para posteriormente transformarse en globales, ganando tamaño y poder, influencia y presencia internacional. Nuevamente se podía decir en verdad: "sol mihi semper lucet, el sol brilla siempre sobre mí". Con la llegada de la crisis de extrema dureza y consecuencias insospechadas para las economías desarrolladas se ha hecho más evidente la irrupción de los países emergentes que con sus empresas multinacionales como punta de lanza han transfigurado la economía mundial en latitud y longitud. España y sus multinacionales ante esta grava sima sacudida que depara unas realidades inditadas en el

sistema económico y financiero mundial deben estratégicamente hacerle frente desde la colaboración cooperativa pública privada si no quieren perder tamaño o poder influencia y presencia internacional. En tanto la globalización avanza y se hace multipolar los países incrementan sus interrelaciones en todas las direcciones y las multinacionales adquieren nuevas dimensiones en el renovado tablero del ajedrez económico mundial. Esto provoca que economías desarrolladas como la española cambien de modelo productivo y reconfiguren su economía en sintonía con la nueva era de la información y el conocimiento haciendo que sus empresas intensifiquen su eficiencia, imagen y competitividad en un mundo amplificado por los países emergentes que continúan ganando protagonismo a lo largo del siglo XXI. El autor analiza las consecuencias y alcance de este *Zeitgeist* o nuevo espíritu de los tiempos a la vez que propone un amplio y riguroso debate abierto a las ideas que surjan de la interacción con los lectores y con todos aquellos interesados en recuperar y potenciar el papel y lugar que verdaderamente le corresponde a España y sus multinacionales en este nuevo mundo global y multipolar del presente siglo. El CD incluye lecturas complementarias documentos de interés y estadísticas de economía internacional y empresas multinacionales españolas.

Ramón Casilda Barbero es economista y master en Administración y Dirección de Empresas por ICADE Universidad de Comillas. Actualmente ejerce su actividad profesional en calidad de asesor de la presidencia de BT Global Services para América Latina.

[Desarrollo y Civilización](#)

Theotonio Dos Santos, 2018-07-28

El concepto de civilización surge en el siglo XVIII e incluso aparece como entrada en la Encyclopédie de los Ilustrados. La idea de civilización se asociaba entonces con la constitución de una sociedad civil de los ciudadanos que se diferenciaba de las formas políticas anteriores y daba origen a una organización social específica que se correspondía con una moral más adecuada a la naturaleza humana. En ese momento se consagra la idea del individuo como fundador de la sociedad y como creador de productos que son el fruto del trabajo. Se comprende así cómo la economía política así llegó a la noción de valor. Ella reflejaba el gran paso dado en busca de la comprensión de los avances sociales producido por el aumento colosal de la productividad como consecuencia básicamente del desarrollo de las manufacturas y posteriormente de la Revolución industrial. Era por lo tanto natural que se gestase en el norte de Europa y en particular en Inglaterra donde se concentraba esta revolución, la idea de que el gran desarrollo de las fuerzas productivas que se consolidaba en esas regiones y de las formas sociales allí asociadas daría lugar a un estadio superior de la sociedad humana que se caracterizaba por crear una forma social asociada cada vez más con el concepto de civilización.
