Contributions to New Zealand Botany William Lauder Lindsay, 1868 *The Social Life of Materials* Adam Drazin, Susanne Küchler, 2020-06-08 Materials play a central role in society Beyond the physical and chemical properties of materials their cultural properties have often been overlooked in anthropological studies finished products have been perceived as social yet the materials which comprise them are considered raw or natural The Social Life of Materials proposes a new perspective in this interdisciplinary field Diverting attention from the consumption of objects the book looks towards the properties of materials and how these exist through many transformations in a variety of cultural contexts Human societies have always worked with materials However the customs and traditions surrounding this differ according to the place the time and the material itself Whether or not the material is man made materials are defined by social intervention Today these constitute one of the most exciting areas of global scientific research and innovation harboring the potential to act as key vehicles of change in the world But this materials revolution has complex social implications Smart materials are designed to anticipate our actions and needs yet we are increasingly unable to apprehend the composite materials which comprise new products Bringing together ethnographic studies of cultures from around the world this collection explores the significance of materials by moving beyond questions of what may be created from them Instead the text argues that the materials themselves represent a shifting ground around which relationships identities and powers are constantly formed and dissolved in the act of making and remaking **New Zealand Journal of Crop and Horticultural Science/Experimental Agriculture** ,1992 **Quick Bibliography Series** ,1976 *Subject-index of the Books in the Author Catalogues for the Years 1869-1895* Public Library of New South Wales. Reference Dept, 1903 **New Zealand Journal of Crop and Horticultural Science/Experimental Agriculture** ,1992 *Biological Control: Measures of Success* G. Gurr, S.D. Wratten, 2012-12-06 As well as examining successful biological control programmes this book analyses why the majority of attempts fail Off target and other negative effects of biological control are also dealt with Chapters contributed by

leading international researchers and practitioners in all areas of biological control afford the book a breadth of coverage and depth of analysis not possible with a single author volume Combined with the use of other experts to review chapters and editorial oversight to ensure thematic integrity of the volume this book provides the most authoritative analysis of biological control published Key aspects addressed include how success may be measured how successful biological control has been to date and how may it be made more successful in the future With extensive use of contemporary examples photographs figures and tables this book will be invaluable to advanced undergraduate and postgraduate students as well as being a must for all involved in making biological control successful **Journal of the Royal Society of New Zealand** ,1986-03
