Economic Processes And Political Conflicts Contributions To Modern Political Economy:

Economic Processes and Political Conflicts Richard W. England, 1987 **Economic Processes and Political Conflicts** Richard W. England, 1987 **The Dynamics of Economic and Political Relations Between Africa and Foreign Powers** Tukumbi Lumumba-Kasongo, 1999-01-30 International relations at large and Africa's in particular are shaped by the actors' historical location by what they offer economically and culturally and by who they are socially. In international relations, nations tend to deal with objective conditions as they are or as they are perceived. However, Lumumba-Kasongo demonstrates through case studies of Liberia and Zaire Congo that what the objective conditions are may not necessarily be what they ought to be in the national development process. The international struggle for power between the West and the East and their supportive brutal and oppressive states in the South, especially in Africa, created the extremely weak conditions that redefined international relations as the tools of domination rather than the tools of understanding and cooperation. As Lumumba-Kasongo clarifies, Africa did not gain economically or developmentally from this struggle. An important work for scholars and researchers of contemporary Africa and international relations in general. *Evolutionary Concepts in Contemporary Economics* Richard W. England, 1994 This anthology reports on a number of contemporary attempts to introduce evolutionary concepts into economic analysis. *F. W. Taylor* John Cunningham Wood, Michael C. Wood, 2002 Following the volumes on Henri Fayol, this next mini set in the series focuses on F. W. Taylor, the initiator of scientific management. Taylor set out to transform what had previously been a crude art form into a firm body of knowledge.

Crime And Capitalism David Greenberg, 2010-06-10 Classic and contemporary viewpoints on crime. *The Political Economy of Conflict and Violence against Women* Kumudini Samuel, Claire Slatter, Vagisha Gunasekara, 2019-08-15 The Political Economy of Conflict and Violence against Women shows how political, economic, social, and ideological processes intersect to shape conflict-related gender-based violence against women. Through feminist interrogations of the politics of economies, struggles for political power, and the gender order, this collection reveals how sexual orders and regimes are linked to spaces of production. Crucially, it argues that these spaces are themselves firmly anchored in overlapping patriarchies which are sustained and reproduced during and after war through violence that is physical as well as structural. Through an analysis of legal regimes and structures of social arrangements, this book frames militarization as a political-economic dynamic, developing a radical critique of liberal peace building and peace making that does not challenge patriarchy or modes of production and accumulation. *Global Political Economy and the Wealth of Nations* Phillip Anthony O'Hara, 2004 Documents the major processes, performance, institutions, problems, and policies associated with global political economy. This book presents an analysis of the changing distribution and production of wealth throughout the world, the global technological revolution, and a special study of Asia and Eastern Europe in the world system. On Political Economists and Modern Political Economy Geoffrey Colin Harcourt, 2003 This book reflects Geoff Harcourt's contribution to economic debate.

over more than three decades It also includes intellectual biographies of some of the most prominent and leading unorthodox economists **Political Power and Economic Policy** Gordon C. Rausser, Johan Swinnen, Pinhas Zusman, 2011-09-30 This book analyzes the links between political economics governance structures and the distribution of political power in economic policy making The book theoretically explains and empirically quantifies these interactions The analysis includes both public good policies and redistributive policies Part I of the book presents the conceptual foundations of political economic bargaining and interest group analysis After presenting the underlying theory Part II of the book examines ideology prescription and political power coefficients Part III analyzes a number of specific structures and Part IV presents a framework for political econometrics with a number of empirical applications and testable hypotheses In all four parts of the book four analytical dimensions of public policy are distinguished governance structures political economy mechanism design and incidence **The Routledge Handbook of the Political Economy of the Environment** Éloi Laurent, Klara

Zwickl, 2021-10-27 Featuring a stellar international cast list of leading and cutting edge scholars The Routledge Handbook of the Political Economy of the Environment presents the state of the art of the discipline that considers ecological issues and crises from a political economy perspective This collective volume sheds new light on the effect of economic and power inequality on environmental dynamics and conversely on the economic and social impact of environmental dynamics The chapters gathered in this handbook make four original contributions to the field of political economy of the environment First they revisit essential concepts and methods of environmental economics in the light of their political economy Second they introduce readers to recent theoretical and empirical advances in key issues of political economy of the environment with a special focus on the relationship between inequality and environmental degradation a nexus that has dramatically come into focus with the COVID crisis Third the authors of this handbook open the field to its critical global and regional dimensions global issues such as the environmental justice movement and inequality and climate change as well as regional issues such as agriculture systems air pollution natural resources appropriation and urban sustainability Fourth and finally the work shows how novel analysis can translate into new forms of public policy that require institutional reform and new policy tools Ecosystems preservation international climate negotiations and climate mitigation policies all have a strong distributional dimension that chapters point to Pressing environmental policy such as carbon pricing and low carbon and energy transitions entail numerous social issues that also need to be accounted for with new analytical and technological tools This handbook will be an invaluable reference research and teaching tool for anyone interested in political economy approaches to environmental issues and ecological crises *Elites, Nonelites, and Power* Rebecca Jean Emigh, Dylan Riley, 2024-11-28 Bringing together cutting edge multidisciplinary papers that weigh in on central issues of the world and social science the collection consider power elites and nonelites in a new inclusive way drawing in researchers who deal with topics central to elite theory but who might not be represented in more classic statements of it Contemporary Issues in Heterodox

Economics Arturo Hermann, Simon Mouatt, 2020-10-07 Heterodox economics can provide a more complete and robust explanation of economic realities than orthodox or mainstream economics Contemporary Issues in Heterodox Economics Implications for Theory and Policy Action argues that this greater explanatory power gives heterodox economics the ability to illuminate appropriate policy for the major crises of our time as well as proffer the basis for a more rounded pluralist approach to economic theory The chapters in this wide ranging volume address some of the key issues facing the global economy including the growing disparity of income wealth between persons and economic areas environmental degradation issues associated with employment and the regularity of economic financial crises The authors examine potential policy responses such as modern monetary theory models of public ownership and the need to move beyond standard concepts of growth They also explore the deficiencies of orthodox economics and contend that a more pluralist approach to economics is required in the public sphere in academia and in the classroom in order to help face the challenges of the twenty first century This book is invaluable reading for students and scholars across the social sciences who are interested in alternatives to mainstream economic thinking

The Political Economy: Readings in the Politics and Economics of American Public Policy Thomas Ferguson, Joel Rogers, 2021-02-14 The Political Economy is ideally suited as a supplementary text for courses in American government and politics policy studies business government relations and economic issues and policy making It integrates selections from the very finest new and classical works of political and economic analysis by distinguished scholars into a comprehensive overview of the American political system

Reconstructing Urban Economics Franklin Obeng-Odoom, 2016-08-15 Neoclassical economics the intellectual bedrock of modern capitalism faces growing criticisms as many of its key assumptions and policy prescriptions are systematically challenged Yet there remains one field of economics where these limitations continue virtually unchallenged the study of cities and regions in built environment economics In this book Franklin Obeng Odoom draws on institutional Georgist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics In doing so he demonstrates the widespread tensions and contradictions in the status quo showing how to reconstruct urban economics in order to create a more just society and environment
