Dunning, 2008-10-16 Are transnational corporations TNCs and foreign direct investment beneficial or harmful to societies around the world Since the birth of the United Nations more than 60 years ago these questions have been major issues of interest and involvement for UN institutions What have been the key ideas generated by the UN about TNCs and their relations with nation states How have these ideas evolved and what has been their impact This book examines the history of UN engagement with TNCs including the creation of the UN Commission and Centre on Transnational Corporations in 1974 the failed efforts of these bodies to craft a code of conduct to temper the revealed abuses of TNCs and with the advent of globalization in the 1980s the evolution of a more cooperative relationship between TNCs and developing countries resulting in the 1999 Global Compact *Apostles of Development* David C. Engerman, 2025-05-30 The battle against global poverty that began after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and development *Apostles of Development* examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but when it looks for what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modestly focusing on practical matters such

as addressing gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read *International Encyclopedia of Human Geography*, 2009-07-16 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas The encyclopedia includes over 1 000 detailed entries on philosophy and theory key concepts methods and practices biographies of notable geographers and geographical thought and praxis in different parts of the world This groundbreaking project covers every field of human geography and the discipline's relationships to other disciplines and is global in scope involving an international set of contributors Given its broad inclusive scope and unique online accessibility it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades The Encyclopedia will be available in both limited edition print and online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit http://info.sciencedirect.com/content/books_ref_works coming Available online on ScienceDirect and in limited edition print format Broad interdisciplinary coverage across human geography Philosophy Methods People Social Cultural Political Economic Development Health Cartography Urban Historical Regional Comprehensive and unique the first of its kind in human geography *Levels of Socio-economic Development Theory* David Jaffee, 1998-07-30 Advanced undergraduates graduate students and social scientists interested in a wide ranging but concise review of contemporary theories of social and economic development will find this second edition invaluable The coverage spans the disciplines of sociology psychology economics political science political economy geography and management The theories are organized by level of analysis individual organizational societal and international to provide the reader with a larger organizational scheme in which to understand the theoretical explanations and arguments and to emphasize the importance of developing linkages among the different levels Some of the new topics discussed include globalization transnational organizational structures debt the transition from socialism to capitalism and human development **International Political Economy** Benjamin J.
