Integration is provided always in mind the perspective of economic integration and therefore the ongoing battle of the two approaches to gain more importance in the process While doing so I analyse phases or stages in which one of these approaches has been increasingly dominant in the integration process and try to analyse why this special pattern has occurred At the end of my paper I combine the economic perspective to integration with a more general but interesting concept to integration processes which could help to overcome the increasing stagnation tendencies in European Integration that is one of the main findings of my earlier analysis Although this Concept named Differentiated Integration provides one with extensive measures to reform the integration process I limit the perspective to mostly the changes and proposals with importance to economic integration as this is the core issue of this paper Thus the final presentation of reform proposals is less focused on how the European Union as a final Political Union could look like in the far future but more on how to overcome stagnation tendencies and gain dynamic impulses again with more technically orientated middle term actions

between member countries are abolished and a common external tariff is imposed on external countries Following to this level free factor mobility of production and of financial assets generate a common market Next steps to economic integration are the Monetary and lastly the Economic Union by having a common currency and policy Theme of this essay is critical arguments of disestablish trade barriers towards the European Union EU and its underlying economic theories in respective to the Single Market Programme SMP its aims and if they are achieved in terms of labour and social policies Therefore it is necessary to have a focus on the removal of non tariff barriers NTBs exemplary for goods and labour *The Economics of European Integration* Richard Baldwin, Charles Wyplosz, 2020 **The Politics and Economics of European Integration** Uwe W.
