Imported oil already accounts half of China's total consumption and is forecast to increase to 80 percent by 2030. China's International Petroleum Policy focuses on six major issues: the evolution of China's petroleum governance regime, the making of China's international petroleum policy, the international expansion of China's national oil companies, the challenges confronting Chinese oil companies on the international petroleum chessboard, Beijing's petroleum diplomacy, and the implications of China's international petroleum policy. Each chapter describes the historical and institutional context of a particular issue, the key players, and the structures and processes through which policy is developed and implemented.
