**Economics, Politics, and American Public Policy** James Gosling, Marc Allen Eisner, 2015-01-28 This text introduces students to the interrelationship of politics and economics in American public policymaking how economic concerns have been legislated into

law since Franklin Roosevelt's time and how politics e.g. Washington gridlock affects the economy and the making of public policy. Students learn how to measure various indicators of economic performance how the U.S. economy works domestically and with international linkages and how and why policymakers act to stabilise an economy in an economic downturn. Additionally many social insurance programs Social Security Medicare Medicaid are explained and the current fiscal issues concerning current future costs are treated in some detail. The book concludes with a full chapter case study on the Obama administration's response to the Great Recession and its dealings with Congress the implementation of the Affordable Care Act is also discussed.

*Resource Nationalism and Energy Policy* David R. Mares, 2022-10-04 It is widely thought that state ownership of natural resources oil and natural gas in particular causes countries to fall under the sway of the resource curse. In such cases governments allegedly display resource nationalism which destabilizes the economy society and politics. In this book David R. Mares dispels these beliefs and develops a powerful new account of the relationship between state resource ownership and energy policy. Mares examines variations in energy policy across a wide range of countries underscoring the fact that in most of the world outside the United States subsoil natural resources are owned by the state. He considers the history of Latin American oil and gas policies and provides an in depth analysis of Venezuela from 1989 to 2016 before during and after the presidency of Hugo Chavez. Mares demonstrates that the key factors that influence energy policy are the inclusiveness of the political system the level of competitiveness within policy making and the characteristics of individual leaders. Domestic politics not state ownership determines the effectiveness and efficiency of energy policies the resource curse is avoidable. Drawing on these findings Mares reconceptualizes resource nationalism arguing that government intervention into resource extraction is legitimate as long as the benefits are shared through the provision of public goods. Featuring a sophisticated grasp of both Latin American politics and energy policy this book sheds new light on why some governments are responsible stewards of natural resources while others appropriate national wealth for partisan or private benefit.

**Globalizing Oil** Llewelyn Hughes, 2014-01-16 Oil is the world's most important commodity. It is also one of the most politicized with national oil companies controlling most of the world's reserves. Contrary to conventional wisdom Llewelyn Hughes shows that governments across the advanced industrial states responded to the politicization of oil in the 1970s by freeing prices lowering barriers to trade and privatizing national oil companies. How did this come about? And why do some governments continue to support domestic firms? In answering these questions Hughes shows that the politicization of oil also led to a transformation in oil market governance by changing the balance of risk and opportunities facing firms. He also shows that their ability to benefit from this change was conditioned by previous attempts to shape the competitive landscape in their favor. Hughes' study has important implications not only for the politics of oil but also for the study of economic liberalization.
