## Ecology And Man:

*The Subversive Science* Paul Shepard, 1969 Population explosion pollution suburban sprawl death of the city the vanishing wilderness we keep hearing of these threats but usually manage to ignore them In this book we find instead a number of clear calm discussions of environmental problems providing information and ideas without excessive emotional appeal The 37 papers chosen from a wide variety of journals such as Human Biology Daedalus Landscape American Scientist are obviously intended for the nonspecialist intelligent reader They are divided into five groups of which the first deals with population problems both human and animal The Environmental Encounter is the title of a group of papers discussing man's reaction to his environment what he sees and the way he feels about it Here are included comments on American front yards the shapes of roofs in different European countries the importance of sacred places and an essay by Alan Watts reprinted from The Psychedelic Review The third and fourth sections are called Man and Other Organisms and Man in Ecosystems Here we learn about the domestication of cattle sidelights on evolution Ren Dubos comments on the germ theory the possible unexpected effects of pesticides and radiation A hopeful note appears in a discussion of the use of solar energy The final part called Ethos Ecos and Ethics includes more philosophical commentaries Especially interesting is a discussion by Lynn White of the historical roots of our ecologic crisis from a review by Marjorie C Meehan in [jama.jamanetwork.com article.asp?articleid=345416](http://jama.jamanetwork.com/articleid/345416) The Ecology of Man Robert Leo Smith, 1976 *The Ecology of Man*, 1957 **The Ecology of Man** Paul Bigelow Sears, 1957 **Man on Earth** S. Schaeffer, Udo W. Middelmann, 2011-03-02 At the creation of the world God gave mankind the responsibility to exercise dominion over the earth Man was to use the earth and its abundance of resources to satisfy his physical needs but he was also to care for the earth and its creatures as a wise and godly steward Reading about endangered species or another oil spill will make it abundantly clear that the human race has failed miserably in its God given mandate How did we get to this point Where should we go from here This classic by Francis Schaeffer now repackaged looks at contemporary ecological crises through the lens of theology and Scripture Renowned for

his work in applied philosophy and theology Schaeffer answers serious philosophical questions about creation and ecology He concludes that we must return to a profoundly and radically biblical understanding of God s relationship to the earth and of our divine mandate to exercise godly dominion over it Repackaged and republished Pollution and the Death of Man carries an important and relevant message for our day With concluding chapter by Udo Middelmann     **The ecology of man** Paul B.
