Economic Basis Of Peace Linkages Between Economic Growth And International Conflict:

The Economic Basis of Peace William H. Mott, William H. Mott IV, 1997-07-16 William Mott examines the relationships between economic growth and international conflict in history and theory developing and analyzing a set of observed empirical modern growth conflict relationships over long periods and presenting an explanation of the observations After introducing the growth conflict relationship as the unit of analysis he identifies historical perceptions of the growth conflict relationship from ancient times through the modern era Mott offers an alternative theoretical construct for further investigation and speculates about the impact of these results on orthodox political economic theory The results of this work carry powerful implications for national management of foreign direct investment and trade in both home countries and host nations

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

Peace Antony Adolf, 2013-05-08 How peace has been made and maintained experienced and imagined is not only a matter of historical interest but also of pressing concern *Peace A World History* is the first study to explore the full spectrum of peace and peacemaking from prehistoric to contemporary times in a single volume aimed at improving their prospects By focusing on key periods events people ideas and texts Antony Adolf shows how the inspiring possibilities and pragmatic limits of peace and peacemaking were shaped by their cultural contexts and in turn shaped local and global histories Diplomatic pacifist legal transformative non violent and anti war movements are just a few prominent examples Proposed and performed in socio economic political religious philosophical and other ways Adolf s presentation of the diversity of peace and peacemaking challenges the notions that peace is solely the absence of war that this negation is the only task of peacemakers and that history is exclusively written by military victors Without the victories of peacemakers and the resourcefulness of the peaceful he contends there would be no history to write This book is essential reading for students scholars policy shapers activists and general readers involved with how present forms of peace and peacemaking have been influenced by those of the past and how future forms can benefit by taking these into account

Water and Peace for the People Jon Martin Trondalen, 2008-01-01 This book proposes practical and objective solutions to the entrenched water conflicts in the Middle East The author reveals and clarifies the complexity of the water conflicts drawing on years of experience facilitating and chairing water negotiations in the region The bottom line is Unless the countries involved cooperate the consequences will be devastating The lack of plentiful and clean water for the people will not only result in

severe human suffering but could also have grave geopolitical consequences The book covers four critical areas the Euphrates and Tigris Rivers where new documentation reveals alarming trends the politically sensitive Golan Heights with its water disputed by Israel and Syria the Hasbani water dispute between Lebanon and Israel the longstanding water resource dispute between the Israelis and Palestinians Limits to Globalization William R. Thompson, Rafael Reuveny, 2009-09-10

Using a world systems approach this book examines how globalization is experienced around the world and compares its intensity and impact in industrialized countries and developing countries focusing on economic growth technological diffusion debt North South conflict democratisation and globalization **West Germany and Namibia's Path to**

Independence, 1969-1990 Thorsten Kern, 2019-05-22 Namibia's main liberation movement the South West Africa People's Organisation SWAPO relied heavily on outside support for its armed struggle against South Africa's occupation of what it called South West Africa While East Germany's solidarity with Namibia's struggle for national self-determination has received attention little research has been done on West Germany's policy towards Namibia which must be seen against the backdrop of inter-German rivalry The impact of the wider realities of the Cold War on Namibia's rocky path to independence leaves ample room for research and new interpretations In *West Germany and Namibia's Path to Independence 1969-1990* Foreign Policy and Rivalry with East Germany Thorsten Kern shows that German division played a vital role in West Germany's position towards Namibia during the Cold War West German foreign policy towards Namibia at the height of the Namibian liberation struggle is investigated and discussed against the backdrop of rivalry with East Germany The two states deeply diverging policies characterised in this context by competition for influence over SWAPO were strongly affected by the Cold War rivalry between the capitalist West and the communist East Yet ultimately the dynamics of rapprochement helped to bring about Namibia's independence This book is based upon a doctoral dissertation presented to the University of Cape Town in 2016 Kern conducted research in the National Archives of Namibia and in German archives and his work draws on interviews with contemporary witnesses Great Power Politics in the Fourth Industrial Revolution Glenn

Diesen, 2021-03-25 Why and how will the fourth industrial revolution impact great power politics Here Glenn Diesen utilizes a neoclassical approach to great power politics to assess how far the development of AI national and localized technological ecosystems and cyber warfare will affect great power politics in the next century The reliance of modern economies on technological advances Diesen argues also compels states to intervene radically in economics and the lives of citizens as automation radically alters the economies of tomorrow A groundbreaking attempt to contextualize the fourth industrial revolution and analyse its effects on politics and international relations **The Decay of Western Civilisation and**

Resurgence of Russia Glenn Diesen, 2018-09-03 What explains the rise of populist movements across the West and their affinity towards Russia UKIP's Brexit victory Trump's triumph and the successive elections and referendums in Europe were united by a repudiation of the liberal international order These new political forces envision the struggle to reproduce and

advance Western civilisation to be fought along a patriotism cosmopolitanism or nationalism globalism battlefield in which Russia becomes a partner rather than an adversary Armed with neomodernism and geoeconomics Russia has inadvertently taken on a central role in the decay of Western civilisation This book explores the cooperation and competition between Western and Russian civilisation and the rise of anti establishment political forces both contesting the international liberal order and expressing the desire for closer relations with Russia Diesen proposes that Western civilisation has reached a critical juncture as modern society gesellschaft has overwhelmed and exhausted the traditional community gemeinschaft and shows the causes for the decay of Western civilisation and the subsequent impact on cooperation and conflict with Russia The author also considers whether Russia s international conservatism is authentic and can negate the West s decadence or if it is merely a shrewd strategy by a rival civilisation also in decay This volume will be of interest to scholars of international relations political science security studies international political economy and Russian studies *The American Economic Review* ,1997 **Russian Conservatism** Glenn Diesen,2021-01-12 Russian conservatism is making a forceful return after a century of experimenting with socialism and liberalism Conservatism is about managing change by ensuring that modernization evolves organically by building on the past Conservatism has a natural attraction for Russia as its thousand year long history is largely characterized by revolutionary change the destructive process of uprooting the past to give way to modernity Navigating towards gradual and organic modernization has been a key struggle ever since the Mongols invaded in the early 13th century and decoupled Russia from Europe and the arteries of international trade Russian history has consisted of avoiding revolutions that are either caused by falling behind on modernization or making great leaps forward that disrupts socio economic and political traditions Russian conservatives are now tasked with harmonizing the conservative ideas of the 19th century with the revolutionary changes that shaped Russia in the 20th century The rise of Asia now provides new opportunities as it enables Russia to overcome its fixation on the West and develop a unique Russian path towards modernization that harmonizes its Eurasian geography and history **Peacemaking in International Conflict I.** William Zartman,2007 This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peacemaking that are currently available and critically assesses their usefulness and limitations **Shaping the Culture of Peace in a Multilateral World** Patrick Petit,2017-07-05 As the world faces a multitude of complexly interwoven challenges new values and new worldviews are emerging to change the ways in which human beings relate to each other to our planet and to all life on Earth In today s globalized world humanity is becoming inescapably aware that coexistence cooperation and respect for diversity are fundamental values by which all of us must live These essential human values which apply in all individual and societal relationships are likewise intrinsic to a culture of peace a way of living that will allow a harmonious multifaceted global civilization to blossom Central to this volume is a belief that in an interdependent world collective decision making for the collective good is the most effective way to move forward

In order to respect the balance among cultures and nations decisions that have a global impact must be taken multilaterally No culture can achieve and maintain its international objectives by acting unilaterally nor can any nation or cultural group claim to represent the whole of humanity Shaping the Culture of Peace in a Multilateral World compiles prominent visionary articles from United Nations institutions and regional and other intergovernmental organizations and highlights the contributions being made to the creation of a culture of peace It aims to strengthen multilateral cooperation among intergovernmental organizations worldwide and to facilitate the formation of a global network of multilateral mechanisms which will provide collective and holistic responses to the peace and security challenges of the 21st century Shaping the Culture of Peace in a Multilateral World is in itself a true example of multilateralism and a publication treasure for people who are active or interested in international diplomacy and international affairs Gandhian Model of Development and World Peace R. China's Big Power Ambition under Xi Jinping Suisheng Zhao,2021-12-14 Instead of emphasizing China as a developing country Chinese President Xi Jinping has identified China as a big power and accentuated China s big power status This book explores the narratives and driving forces behind China s big power ambition Three narratives rooted in Sino centralism are examined One is China s demands for the reform of global governance to reflect the values and interests of China as a rising power Another is China s Belt and Road Initiative to construct a nascent China centred world order The third is the China model and self image promotion in the developing countries There are many forces that have driven or constrained China s big power ambition This collection focuses on two sets of forces One is China s domestic politics and economic incentives and disincentives The other is China s geo political and geo economic interests These forces have both motivated and constrained China s big power ambition The chapters in this book were originally published in the Journal of Contemporary China The Scourge of War Paul Diehl,2010-03-25 J David Singer s legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world s foremost international conflict analysis specialists to reassess COW s contribution to our understanding of global conflict Each chapter takes one of COW s pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer s important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign **The Constitutionalization of International Law** Jan Klabbers,Anne Peters,Geir Ulfstein,2009-10-01 The book examines one of the most debated issues in current international law to what extent the

international legal system has constitutional features comparable to what we find in national law This question has become increasingly relevant in a time of globalization where new international institutions and courts are established to address international issues Constitutionalization beyond the nation state has for many years been discussed in relation to the European Union This book asks whether we now see constitutionalization taking place also at the global level The book investigates what should be characterized as constitutional features of the current international order in what way the challenges differ from those at the national level and what could be a proper interaction between different international arrangements as well as between the international and national constitutional level Finally it sketches the outlines of what a constitutionalized world order could and should imply The book is a critical appraisal of constitutionalist ideas and of their critique It argues that the reconstruction of the current evolution of international law as a process of constitutionalization against a background of and partly in competition with the verticalization of substantive law and the deformalization and fragmentation of international law has some explanatory power permits new insights and allows for new arguments The book thus identifies constitutional trends and challenges in establishing international organisational structures and designs procedures for standard setting implementation and judicial functions This paperback edition features the authors discussion of this book on the EJIL Talks blog
