The State and Economic Development Robert Fitzgerald, 2013-05-13 This book explores the role of national governments during the process of industrialisation in East Asia and examines the relationship between the State and business clearing up many Western misconceptions The similarities and

Government industry linkages and an overview of economic rationale also studied in this volume are following the establishment of market orientated economies in many Far Eastern countries. This book brings new insight into the business politics relationship which gives the reader a complete understanding of the East Asian economic miracle. Regional Economic Development in the United States United States. Economic Development Administration. Office of Policy Coordination, 1967. *Handbook of Economic Development* Kuo-Tsai Liou, 1998-06-25. Featuring over 1900 references, drawings and tables and drawing on disciplines as diverse as political economics, public management and urban affairs, this versatile text offers comprehensive information on major policy and managerial issues important to local and national economic development. Pulling together the work of over 40 researchers, the book examines the role of government in economic advances and reform, provides a complete up to date survey of the literature on local and national economic development, details local and regional economic progress in the US, adopts an innovative interdisciplinary approach to the study of economic expansion and more. *Promoting sustainable local economic development initiatives* Marius Venter, 2022. This book endeavours to outline case studies that promote sustainable Local Economic Development (LED) initiatives. It is generally believed that local governments are the foot soldiers of LED. However, this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives. The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways. The book is an essential part of this sequence of ideas, development and action at a critical time for strategic action directed at a sustainable future. It showcases case studies and responses to the impacts of globalisation as a bridge between urban, rural and institutional action and reveals avenues for local government leadership in communities, research, student engagement and wider interactions.
