National Capitalisms, Global Competition, and Economic Performance Sigrid Quack, Glenn Morgan, Richard Whitley, 2000 Why are some firms successful on global markets whilst others are not In this collection of papers a group of distinguished international researchers examine the inter relationship between national context firm performance and global competitiveness In a series of empirical studies covering major industries such as banking telecommunications construction automobiles and airlines in a number of European countries Great Britain France Germany Holland Finland Slovenia the studies show how distinctive patterns of firm competences and capabilities arise from national contexts These influence the way in which firms perform in response to changing technologies and competitive pressures Thus the impact of the globalisation of economic activity may be to reinforce existing national differences in firm performance rather than producing a homogenisation and standardisation This

S. Sim, 2003 China is a country in the midst of a transition which is inscrutable to almost all observers The leadership has changed from the old guard to the new guard with hardly a slip Capitalism is roaring but somehow at the same time doesn't exist The economy is booming in virtually all areas The military is growing more powerful each year many industries are at world level and China is taking more and more steps to join the international community while being sure as she doesn't snuggle up too closely Still with a population of 1.3 billion and staggering poverty in the rural areas making up the vast part of the country the face of China remains centuries old Where she goes nobody knows This series examines the issues policies and progress of China's transition *Rivalry And Cooperation In The Asia-Pacific: The Dynamics Of A Region In Transition (In 2 Volumes)* Mark Beeson, 2019-09-23 Rivalry and Cooperation in the Asia Pacific provides a comprehensive and accessible introduction to the most important strategic and economic region in the world Asia Pacific is a region that is undergoing a major transformation largely as a consequence of the rise of China and its growing rivalry with the United States Whatever happens in the Asia Pacific will profoundly influence global events not just regional ones Looking ahead the region's future direction and even its name is contested and uncertain This two volume reference work by one of the world's leading analysts of regional affairs places these events in historical context and considers what they may mean for future political economic and strategic relations By focusing on the United States China and the region's most significant middle powers the book explains why and how the Asia Pacific has become the fulcrum of international events *Culture, Organization and Management in East Asia* Harry Wels, 2002 Current management books and manuals make a popular topic out of doing business in China and they operate on the assumption that Chinese business culture strongly contrasts Western However evidence suggests that tensions between value and market and community and individual are part of every market entering society while only the reactions differ This new book raises questions about the ways personal relations are dealt with in China specifically relations between Chinese and Western partners Social relationships carry considerable weight in Chinese culture with special emphasis on the role of social connections and rules of conduct The chapters of this book analyse and assess the methods for harmonising business relations across cultures **East Asian Direct Investment in Britain** Philip Garrahan, John Ritchie, 2013-10-23 The contributions investigate indicators of change and the interaction with FDI from East Asia against the background of changes in the regional economy since the mid 1980s They discuss in particular how the North tackled long term decline and the long term implications for the region Hong Kong Stephen Chiu, Tai-Lok Lui, 2009-06-09 Hong Kong is a small city with a big reputation As mainland China has become an economic powerhouse Hong Kong has taken a route of development of its own flourishing as an entrepot and a centre of commerce and finance for Chinese business then as an industrial city and subsequently a regional and international financial centre This volume

examines the developmental history of Hong Kong focusing on its rise to the status of a Chinese global city in the world economy Chiu and Lui's analysis is distinct in its perspective of the development as an integrated process involving economic, political and social dimensions and as such this insightful and original book will be a core text on Hong Kong society for students

Habitus: A Sense of Place Emma Rooksby, 2017-09-19 Habitus is a concept developed by the late French sociologist Pierre Bourdieu as a sense of one's place, a sense of the other's place. It relates to our perceptions of the positions or place of ourselves and other people in the world in which we live and how these perceptions affect our actions and interactions with places and people. Habitus implies that a web of complex processes links the physical, the social and the mental. Inspired by this concept, this compelling book brings together leading scholars from interdisciplinary fields to examine ways in which spaces and places are constructed, interpreted and used by different people. This second edition contains updated chapter material together with an entirely new introduction and revised conclusions which recognise the importance of Bourdieu's work. This publication is a tribute to Pierre Bourdieu's remarkable contribution to the fields of sociology, anthropology, geography, political philosophy and urban planning

Trade and Capital Flow among Asian Economies Chris Rowley, 2013-10-18 Trade and capital are important in the Asia region. Trade in the APEC region has been increasing but the large rise in China's exports has also been disturbing as it exhibits export substitution. The first two papers conclude that every economy has gained in trade though some are more successful than others. And that rise in export has a lot to do with a rise in foreign direct investments. Macroeconomic stability is the pre-condition to growth. Empirical studies show that the lack of stability has encouraged capital to flee an economy. Similarly, a market-oriented, price-driven and matured financial market provides an alternative source of funding. The lesson in economic development is that success in economic growth requires both an externally friendly market environment as well as consistent and favourable internal policies

Technical Progress and Economic Growth Randal J. Taylor, 2007-01-01 This innovative book accumulates the various and often conflicting growth theories which enable a greater understanding of growth processes in the developing world. It will be of interest to students of development studies, Asia studies and public policy as well as to research scholars and practitioners including government officials and policymakers
