**Economic Analysis Beyond the Local System** Richard E. Blanton, 1997 Co published with the Society for Economic Anthropology this work explores the social political and economic contexts and consequences of economic interaction beyond the local systems Because the focus of economic analysis is often local particularly in anthropology this book specifically aims analysis beyond the local system of economic interaction [Economic Analysis Beyond the Local System](#) Richard E.

Blanton, 1997 NOTE Special Title Co published with Society for Economic Anthropology **Theory in Economic Anthropology** Jean Ensminger, 2002 Comprising 13 contributions mostly based on papers presented at the annual conference of the Society for Economic Anthropology in 1998 at Northwestern University this volume focuses several themes the new institutionalism wealth exchange and the evolution of social institutions small producers interactions with the wider world commodity chains and the formal informal sector distinction and the role for big theory in economic anthropology Annotation copyrighted by Book News Inc Portland OR [The Anthropology of Complex Economic Systems](#) Niccolo Leo Caldararo, 2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In [The Anthropology of Complex Economic Systems](#) Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions on which the modern science of economics has been erected are false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation
