China, the USA and Capitalism's Last Crusade William Briggs,2021-10-29 As the sun rises on China and sets on America the world holds its breath China the USA and Capitalism s Last Crusade looks at the rise of China and the decline of the USA but from a different angle William Briggs argues that this struggle for economic supremacy is being played out against a much bigger backdrop the decline of the economic structure of capitalism In this sense the decline of the USA is portrayed as that larger economic decline in microcosm Briggs examines the relationship between state and capital of how capitalism came to dominate the world and of the historical political and economic rise of both the USA and China He shows that the struggle between the two nations has little to do with cultural historical demographic political or ideological differences but with what they have in common Despite the portrayal of China as being socialist it functions as a capitalist economy in the globalised capitalist world While its journey to capitalism may have differed the end point is the same and this is why there is such animosity such conflict such acrimony between the two states

Postcolonial Transition and Global Business History Stephanie Decker,2022-11-30 British multinationals faced unprecedented challenges to their organizational legitimacy in the middle of the twentieth century as the European colonial empires were dismantled and institutional transformations changed colonial relationships in Africa and other parts of the world This book investigates the political networking and internal organizational changes in five British multinationals United Africa Company John Holt Co Ashanti Goldfields Corporation Bank of West Africa and Barclays Bank DCO These firms were forced to adapt their strategies and operations to changing institutional environments in two English speaking West African countries Ghana formerly the Gold Coast and Nigeria from the late 1940s to the late 1970s Decolonization meant that formerly imperial businesses needed to develop new political networks and change their internal organization and staffing to promote more Africans to managerial

roles This postcolonial transition culminated in indigenization programmes and targeted nationalizations which forced foreign companies to sell equity and assets to domestic investors in the 1970s Postcolonial Transition and Global Business History is the first in depth historical study on how British firms sought to adapt over several decades to rapid political and economic transformation in West Africa Exploring both postcolonial transitions and development discourse this book addresses the topics with regard to business and economic history and will be of interest to researchers academics and students in the fields of organizational change political economy African studies and globalization

An Economic History of the Middle East and North Africa Charles Issawi, 2013-10-16 The economic history of the Middle East and North Africa is quite extraordinary This is an axiomatic statement but the very nature of the economic changes that have stemmed directly from the effects of oil resources in these areas has tended to obscure longterm patterns of economic change and the fundamental transformation of Middle Eastern and North African economies and societies over the past two hundred years In this study Professor Issawi examines and explains the development of these economies since 1800 focusing particularly on the challenge posed by the use and subsequent decline of Western economic and political domination and the Middle Eastern response to it The book begins with an analysis of the effects of foreign intervention in the area the expansion of trade the development of transport networks the influx of foreign capital and resulting integration into international commercial and financial networks It goes on to examine the local response to these external forces migration within to and from the region population growth urbanization and changes in living standards shifts in agricultural production and land tenure and the development of an industrial sector Professor Issawi discusses the crucial effects of the growth of oil and oil related industries in a separate chapter and finally assesses the likely gains and losses in this long period for both the countries in the area and the Western powers He has drawn on long experience and an immense amount

of material in surveying the period and provides a clear and penetrating survey of an extraordinarily complex area Our
