Technological Change in the Modern Economy Paul R. Beije, 1998 Technological Change in the Modern Economy presents an authoritative overview of the economics of technological change Using an empirical foundation it examines the economic causes and effects of technological innovation It also analyzes the process of innovation itself The author first provides an

introduction to innovation and technical change He expands this to include issues such as innovation and economic growth the organization of innovation innovation and competition and the role of government He also discusses new topics such as technological cooperation the spillover effects of research the firm as a learning organization and national systems of innovation These issues are analysed empirically employing theoretical explanations to support case studies on Europe The United States and Japan The book uses an institutional economics approach discussing the role of various actors such as individual inventors research departments of private firms and public research institutes The book will provide an introduction to the economics of innovation for advanced undergraduates and for managers and public administrators involved in innovation It will also be of interest to those studying industrial organization and institutional economics and will be accessible to those from business administration and management science

The Economics of Localized Technological Change and Industrial Dynamics Cristiano Antonelli, 2012-10-04 The concept of localized technological change is emerging at the crossroads of different approaches to the economics of innovation and new technologies The term localized technological change refers to the introduction of technological changes which make possible an increase in total factor productivity within only a limited range of techniques defined by the levels of factor intensity This contrasts with generalized technological change which is defined as the global shift of all the techniques represented on the map of isoquants of the neoclassical tradition The Economics of Localized Technological Change elaborates the notion of localized technology with respect to firms factor substitution sectors regions and techniques It also assesses the implications for industrial policy technology and innovation policy The book will be of interest to corporate policy makers scholars of industrial organization and economics of innovation as well as business school students

Handbook of the Economics of Innovations and Technological Change Paul Stoneman, 1995 This volume presents the first comprehensive detailed and up to date overview of current knowledge in the Economics of Technological Change It both reviews what is known and accepted as the best thinking in the field and sets the agenda for research in the future by taking the reader to the boundaries of the subject Each major topic is surveyed by a leading international expert in the field and the articles are specifically designed to be both rigorous and accessible The quality and range of the contributions has ensured that the book is unique in covering the field in all its various dimensions whilst achieving the depth of analysis needed in each For those in the fields of the Economics of Technological Change Industrial Organization and Science and Technology Policy this book will be an essential text and reference The material will be invaluable and accessible to students and researchers as well as those working or setting policy in these fields

Technological Change, Economic Development and Space Cristoforo S. Bertuglia, Manfred M. Fischer, Giorgio Preto, 2012-12-06 The pressures of global competition are affecting regions throughout the world and making it increasingly necessary to understand the complex underlying mechanisms and the potential for innovation offered by new technology Success in economic restructuring depends not only on the technology itself but the

professional and entrepreneurial skills available and the support of provided by institutions and information networks The very local nature these phenomena which are critical to the innovative propensity of firms operating within the region introduces an inevitable spatial dimension The time therefore seems ripe to bring together contributions from scholars working in different but related disciplines with the aim of investigating the triangular relationship between technological change economic development and space The present volume offers a compact review of current theoretical developments and valuable insights deriving from recent empirical studies carried out both within Europe and elsewhere All those contributing to this volume are actively involved in research in the field Without their intellectual contribution and willingness to participate in this joint project the book would not have been possible We should like in addition to thank Angela Spence for her capable assistance in coordinating the various stages of preparation of the book as well as her translation work and careful linguistic editing Thanks also go to Paola Stasi for her meticulous copy editing and help in preparing the indices Their work has been invaluable in moulding together in a single volume contributions from so many different sources

Microdynamics of Technological Change

Cristiano Antonelli, 2002-01-04 This volume presents a comprehensive assessment of the economic effects of the emerging information and communication technologies associated with a knowledge based economy and looks at how knowledge is increasingly treated as a product in its own right An original framework is developed to comprehend these fundamental shifts based on three bodies of knowledge the economics of path dependence and of historical time as they are elaborated in the economics of new technologies economic topology based on the methodology of network analysis the new economics of knowledge and the concept of localized technological change This book provides a unified analytical framework for the study of the transition of advanced economic systems towards a knowledge based economy

Technology and Economic Development Edward J. Malecki, 2009 This study examines the effects of technological change on economic growth and development synthesizing extensive research from multiple disciplines including geography and planning regional science entrepreneurship technology policy and economics It uses the framework of regional development to encompass economic dynamics at all spatial scales national regional and local The concept of regional development is introduced as the qualitative or structural features of a region's economy as opposed to its sheer size or growth rate The analysis also examines the core periphery dichotomy where the core is defined as a set of regions in which complexity technology and control are the norm and where linkages to other nodes and the global system are common The discussion also draws a distinction between economic growth and economic development the former designates increases in population within a specific area or increases in the quantity or the value of the goods and services and does not necessarily lead to qualitative improvements in life the way development does Technological capability is closely related to capability in R conventional strategies are changing to encompass people their contacts and skills as another vital basis for success of firms in new technologies and in alliances and

other cooperations The location of economic activities is explored There are two major sets of influences on the innovativeness and competitiveness of places 1 technical skills and information are key in the process of technological change and competition and 2 urban areas contain a complex synergy of factors that smaller more remote places cannot attain Producer services which are strongly based on knowledge and symbolic analysis are therefore typically clustered in cities Small firms and entrepreneurship are examined as a crucial part of a well functioning regional economy Research has demonstrated the close relationship between entrepreneurship and regional and local development Innovativeness developed within local inter firm networks both supports existing firms and presents opportunities for starting new businesses in order to serve newly identified markets Networks of firms complement and sometimes substitute for a firm s own technological capability Networks of large firms and the globalization of economic activity are then considered Policy attempts at national regional and local scales to influence the location of economic activity are analyzed The economic progress and prospects of developing countries are assessed Policies for innovation entrepreneurship and the functioning of the economy are essential and require flexibility in order to respond to changing conditions in the world economy in specific product markets and in technology Concludes with a discussion of some of the central themes that were facing society at the end of the 1990s including basic needs for human development environmental issues employment and human capital and infrastructures for future technologies AT
