Harnessed Mark Changizi, 2011-08-02 The scientific consensus is that our ability to understand human speech has evolved over hundreds of thousands of years After all there are whole portions of the brain devoted to human speech We learn to understand speech before we can even walk and can seamlessly absorb enormous amounts of information simply by hearing it Surely we evolved this capability over thousands of generations Or did we Portions of the human brain are also devoted to reading Children learn to read at a very young age and can seamlessly absorb information even more quickly through reading than through hearing We know that we didn't evolve to read because reading is only a few thousand years old In *Harnessed* cognitive scientist Mark Changizi demonstrates that human speech has been very specifically designed to harness the sounds of nature sounds we've evolved over millions of years to readily understand Long before humans evolved mammals have learned to interpret the sounds of nature to understand both threats and opportunities Our speech regardless of language is very clearly based on the sounds of nature Even more fascinating Changizi shows that music itself is based on natural sounds Music seemingly one of the most human of inventions is literally built on sounds and patterns of sound that have existed since the beginning of time From Library Journal Many scientists believe that the human brain's capacity for language is innate that the brain is actually hard wired for this higher level functionality But theoretical neurobiologist Changizi director of human cognition 2AI Labs *The Vision Revolution* brilliantly challenges this view claiming that language and music are neither innate nor instinctual to the brain but evolved culturally to take advantage of what the most ancient aspect of our brain does best process the sounds of nature it will certainly intrigue evolutionary biologists linguists and cultural anthropologists and is strongly recommended for libraries that have Changizi's previous book From Forbes In his latest book *Harnessed* neuroscientist Mark Changizi manages to accomplish the extraordinary he says something compellingly new about evolution Instead of tackling evolution from the usual position and become mired in the usual arguments he focuses on one aspect of

the larger story so central to who we are it may very well overshadow all others except the origin of life itself communication

The Official Picture Carol Payne, 2013-06-01 Mandated to foster a sense of national cohesion The National Film Board of Canada's Still Photography Division was the country's official photographer during the mid twentieth century Like the Farm Security Administration and other agencies in the US the NFB used photographs to serve the nation Division photographers shot everything from official state functions to images of the routine events of daily life producing some of the most dynamic photographs of the time seen by millions of Canadians and international audiences in newspapers magazines exhibitions and filmstrips In *The Official Picture* Carol Payne argues that the Still Photography Division played a significant role in Canadian nation building during WWII and the two decades that followed Payne examines key images themes and periods in the Division's history including the depiction of women munitions workers landscape photography in the 1950s and 60s and portraits of Canadians during the Centennial in 1967 to demonstrate how abstract concepts of nationhood and citizenship as well as attitudes toward gender class linguistic identity and conceptions of race were reproduced in photographs *The Official Picture* looks closely at the work of many Division photographers from staff members Chris Lund and Gar Lunney during the 1940s and 1950s to the expressive documentary photography of Michel Lambeth Michael Semak and Pierre Gaudard in the 1960s and after The Division also produced a substantial body of Northern imagery documenting Inuit and Native peoples Payne details how Inuit groups have turned to the archive in recent years in an effort to reaffirm their own cultural identity For decades the Still Photography Division served as the country's image bank producing a government endorsed official picture of Canada A rich

archival study *The Official Picture* brings the history of the Division long overshadowed by the Board's cinematic divisions to light

translation of German photographer Albert Renger Patzsch's collected writings. A towering figure in the history of photography, Albert Renger Patzsch (1897–1966) has come to epitomize New Objectivity, the neorealist movement in modernist literature, film, and the visual arts, recognized as the signature artistic style of Germany's Weimar Republic. Today, his images are regularly exhibited and widely considered key influences on contemporary photographers. Whether they capture geometrically intricate cacti, flooded tidal landscapes, stacks of raw materials, or imposing blast furnace towers, Renger Patzsch's photographs embody what his peer Hugo Sieker termed absolute realism, an approach predicated upon the idea that photographers have one task: to exploit the camera's unique capacity to document with uncompromising detail. Not only a photographer, Renger Patzsch was also an influential and lucid writer who advocated his unique brand of uncompromising realism in almost a half-century's worth of articles, essays, lectures, brochures, and unpublished manuscripts addressing photography, technology, and modernity. Drawing on his papers at the Getty Research Institute and other archives, *The Absolute Realist* unites in one volume this skillful photographer's ideas about the defining visual medium of modernity.
