Lockheed-Martin F-22 Raptor Mike Wallace, William G. Holder, 1998 It is called the Raptor The F 22 will be the U S Air Force's premier fighter for the first decades of the 21st century Like other expensive military programs the F 22 endured continuous scrutiny throughout its development the aircraft that evolved was worth the wait The F 22 is definitely top gun it is more agile than current U S aircraft has stealth capability and is flexible in both air to air and air to ground attack missions The Raptor is planned to start operational service with the U S Air Force in the year 2004 and when on line will provide a capability far beyond that of any other fighter aircraft

F-22 Raptor Aircraft Program, 2002 The F 22 Raptor is a next generation fighter attack aircraft using the latest stealth technology to reduce detection by radar Equipped with more advanced engines and avionics than the current F 15 Eagle the F 22 is expected to maintain U S Air Force capabilities against more sophisticated aircraft and missiles in the 21st century In 1986 two contractors were selected to build competing prototypes Lockheed's YF 22 and Northrop's YF 23 which were flight tested in late 1990 In April 1991 the Air Force selected Lockheed's YF 22 design for full scale development now termed Engineering Manufacturing Development EMD The aircraft is powered by Pratt Whitney's F119 engine selected in competition with General Electric's F120 engine If produced as now projected F 22s could begin replacing F 15s after 2005 The Administration's FY2003 budget requested 5.2 billion for the F 22 program in procurement and development funds Through FY2000 Congress provided some 22.8 billion for the F 22 A 341 aircraft program was estimated in June 2000 to cost about 61.9 billion in actual prior year and projected out year expenditures The F 22 program raises questions about its cost and the need for this aircraft the capabilities it would have and the number of these planes needed to meet military requirements The F 22 has had strong congressional support although some have criticized the program on grounds of cost requirements and coordination with other tactical aircraft programs Deletion of procurement funds in the FY2000 defense appropriation bill passed by the House made the future of the program a major issue for House and Senate conferees in 1999 Some question the urgency of beginning production of the F 22 when production of comparable or better aircraft by other countries appears unlikely Others argue that the F 22 should enter production as early as possible to cope with future threats from more advanced air defenses of potential enemies and to maintain the U S position in aviation technology and production The airframe will be produced by Lockheed Martin in Marietta GA and Ft Worth TX and by Boeing in Seattle WA with engines by Pratt Whitney in West Palm Beach FL
