**Peace** Antony Adolf,2009-03-16 How peace has been made and maintained experienced and imagined is not only a matter of historical interest but also of pressing concern Peace A World History is the first study to explore the full spectrum of peace and peacemaking from prehistoric to contemporary times in a single volume aimed at improving their prospects By focusing on key periods events people ideas and texts Antony Adolf shows how the inspiring possibilities and pragmatic limits of peace and peacemaking were shaped by their cultural contexts and in turn shaped local and global histories Diplomatic pacifist legal transformative non violent and anti war movements are just a few prominent examples Proposed and performed in socio economic political religious philosophical and other ways Adolf s presentation of the diversity of peace and peacemaking challenges the notions that peace is solely the absence of war that this negation is the only task of peacemakers and that history is exclusively written by military victors Without the victories of peacemakers and the resourcefulness of the peaceful he contends there would be no history to write This book is essential reading for students scholars policy shapers activists and general readers involved with how present forms of peace and peacemaking have been influenced by those of the past and how future forms can benefit by taking these into account

**What Is This Babbler Trying to Say?** Michael S. Moore,2016-03-03 This book is a collection of revised and updated essays about the Hebrew Bible written by a North American scholar over a period of several decades Subdivided into three parts Torah Prophecy Apocalyptic and Wisdom these seventeen essays attempt to model for younger scholars and students what the discipline of biblical interpretation can look like attending carefully to literary historical canonical and comparative intertextual methods of investigation

**Excavating Asian History** Norman Yoffee,Bradley L. Crowell,2022-05-10 Although history and archaeology each seek to elucidate the past both sets of data are incomplete and ambiguous and thus open to multiple readings that invite contradictory interpretations of human activity This is particularly true when scholars of each field

ignore or fail to understand research in the other discipline Excavating Asian History contains case studies and theoretical articles that show how archaeologists have been investigating historical social and economic organizations and that explore the relationship between history and archaeology in the study of pre modern Asia These contributions consider biases in both historical and archaeological data that have occasioned rival claims to knowledge in the two disciplines Ranging widely across the region from the Levant to China and from the third millennium BC to the second millennium AD they demonstrate that archaeological and historical studies can complement each other and should be used in tandem The contributors are leading historians and archaeologists of Asia who present data issues and debates revolving around the most recent research on the ancient Near East early Islam India China and Southeast Asian states Their chapters illustrate the benefits of interdisciplinary investigations and show in particular how archaeology is changing our understanding of history Commentary chapters by Miriam Stark and Philip Kohl add new perspectives to the findings By showing the evolving relationship between those who study archaeological material and those who investigate textual data Excavating Asian History offers practical demonstrations of how research has been and must continue to be structured

*Ethics and Urban Design* Gideon S. Golany, 1995-08-01

The city according to urban design scholar Gideon Golany is the largest and most complicated project ever produced by humankind. In *Ethics and Urban Design* he challenges design professionals to reexamine their basic assumptions about the urban environment and offers design strategies based on enduring human values. In search of answers to the paradoxical problems of the modern city, Golany takes the reader through the sweep of human settlements from the dawn of civilization to the present. His authoritative examination of the genesis of the city is illuminated by instructive examples of early urban centers: Mesopotamia, the Indus River Valley, the Egyptian cities of the Nile, and the capital cities of ancient China. All are examined in the light of what made them work as major centers of human activity. What Golany finds in the success stories of the past are cohesive sociocultural values that shaped the design of homes, neighborhoods, and cities. These ethical values helped to maintain an equilibrium within the society that permeated its natural social and human-made environments. In the present era, conversely, he finds a major disconnection between human values and the ethics of technology, which has resulted in confusion, imbalance, and dehumanization. To help designers gain a perspective on possible solutions, Golany explains leading comprehensive design strategies, including the valley theory, the urban border zone concept, and the regional concept of Patrick Geddes. In the case study of contemporary Holland, he details what a small, densely populated country has been able to achieve through design planning rooted in environmental ethics. *Future Frontiers for Urban Design*, the culminating section of this groundbreaking book, opens with Golany's vision of the future city. He examines the issues of thermal performance and climate as they relate to urban design and offers the concept of geospace, the earth-enveloped habitat. Buttressing his presentation with detailed information on the mechanics of geospace, Golany describes case studies of the successful use of earth-enveloped habitats in China and Tunisia. He makes a powerful argument for the geospace city as a renewal of ancient traditions that can restore the vital equilibrium between nature and human settlements that we seem to have lost. *Ethics and Urban Design* is a distinguished scholar's analysis and prescription for the city; it offers an abundance of stimulating ideas for the architects, designers, and planners who have assumed responsibility for its future. *Ethics and Urban Design* draws on historical examples and contemporary case studies from around the world to illustrate urban design strategies that can help restore equilibrium to the natural social and built environments of the city. In this stimulating book, urban design scholar Gideon Golany offers architects, designers, and planners both an in-depth analysis of the fundamental issues of urban design and practical options for the design of the future city. Examines the genesis and development of the city from the earliest settlements to the rise of urban society. Presents urban design strategies based on historical examples of early urban centers, including Mesopotamia, the Indus River Valley.

Egypt and China Offers case studies of environmental success stories from Europe Asia and Africa Details geospace design options the use of underground space for diversified land use housing and transportation Fully illustrated with over 80 photographs drawings and diagrams *Dreams, Visions, Imaginations* Jens Schröter, Tobias Nicklas, Armand Puig i Tàrrach, 2021-02-08 The contributions in this volume are focused on the historical origins religious provenance and social function of ancient Jewish and Christian apocalyptic literature including so called Gnostic writings Although it is disputed whether there was a genre of apocalyptic literature it is obvious that numerous texts from ancient Judaism early Christianity and other religious milieus share a specific view of history and the world to come Many of these writings are presented in form of a heavenly divine revelation mediated through an otherworldly figure like an angel to an elected human being who discloses this revelation to his recipients in written form In different strands of early Judaism ancient Christianity as well as in Gnosticism Manichaeism and Islam apocalyptic writings played an important role from early on and were produced also in later centuries One of the most characteristic features of these texts is their specific interpretation of history based on the knowledge about the upper divine realm and the world to come Against this background the volume deals with a wide range of apocalyptic texts from different periods and various religious backgrounds **The shepherd protects their flock** Chris Flaherty, 2021-09-13 This volume looks back into a huge expanse of time identifying an historic juncture where feuding became warfare that was fought by soldiers during a long historical process called the crossing of the military threshold This book examines the first tactics used in warfare weapons and the transition from hunter warriors to soldiers Starting with the Neolithic it then covers the Sumerians and the first micro armies of soldiers The process started during Late Neolithic urbanization and the Chalcolithic Copper Age and was completed by the early Bronze Age with the appearance of King Sargon's Royal Standing Army around 2334 BCE and the warrior armies of the Amorite Elamite and Lullubi
