

caught in the treadmill of office jobs and 'respectable' domestic life. They showed contempt for the mainstream by painting flowers and peace signs on their faces, and wearing a heady combination of home-made hand-dyed dresses and tops, ethnic beads and tunics and denim and velvet flares. Long, unkempt hairstyles for both men and women blurred gender divides further; their fluid 'natural' style was a proven-failed imitation of the American dream and the ethics it stood for, in particular the American government's policies concerning the Vietnam War. To some, the freely middle-class teenagers who made up the bulk of hippies were simply expressing an adolescent desire to irritate and confuse the older generation. Ron Kline wrote of hippies' protest dress in 1973 as if at a game of guessing, and while many hippies were genuine in their protests, there was also an element of antagonism towards their parents' bourgeois ideas of dress and cleanliness to their style. Kline pointed out the hippie's wish to always stay ahead of respectable dress codes: 'Whereas the businessman wanted a white shirt, the hippie wanted a colouration. As soon as the businessman wore a colourful shirt, the hippie looked for a garish one; he always wanted to be different.'²⁴

While in the second half of the twentieth century youth culture has been constantly pursued by the mainstream, which appropriates and normalises its iconoclastic styles, for some hippies there was more at stake than the need to be countercultural. Over the next three decades, environmentalists became increasingly committed to 'saving nature', and promoting a more thoughtful approach to all aspects of life, from home-planting

and road schemes to eating habits and the design and efficiency of household products. While 'hippie' became a term of abuse in a culture obsessed with consumption and the progress of technology, hippie culture evolved in Britain, to include the army-surplus-clad Grouches of the 1980s and the New Age Travellers, who were some of the most ardent ecological campaigners. Their dress once again recurrently rejected obvious expenditure, favouring second-hand and home-made garments mixed with cheap leggings and sturdy boots. At first they were turned into folk devils by the media, they embodied fears of a breakdown in law and order, fed by a misunderstanding of alternative lifestyles, which were perceived as attacking the status quo. The peripatetic lifestyle of the New Age Travellers made them unpopular with landowners, keen to get them off their property, and when collectors like the Spital Fields became involved in staging illegal raves, their media image was further tarnished. Such groups were firstly rejected by the mainstream, which was alarmed by its obvious a refusal to 'accept' lifestyles. While the later anti-road campaigns and the planned construction of the Newbury bypass in 1996 may have made them out of some New Age-environmentalists, hailed in the tabloids for their stance against government transport policy, suspicion remained about those who opted out of conventional lifestyles.

However, even among the more conservative there was a genuine desire to seek out more environmentally friendly products, and thereby not only help to save the planet, but gain a tangential sense of union with a mythical ideal of nature.

This vision was formed as much by marketing strategies that played on feelings of guilt and a sense of lack in an era of rapid technological advance, as on long-held, perhaps deeper, visions of the natural world, as the opposite of constructed culture. This perception of the natural is itself culturally constructed, relying upon both contemporary anxieties about the environment in post-industrial society, and a desire to retreat into false nostalgia for a distant countryside idyll. As Kate Cooper has pointed out:

It is only a culture which has begun to register the negative consequences of its industrial achievements that will be inclined to return to the wilderness, or to aestheticise its return as a form of foreboding against further advances upon its territory.²⁵

For fashion designers, this desire for products which are ecologically sound has meant a search for fabrics that are derived from sources that have as low an impact on the environment as possible, and which are either left untouched and undyed, or coloured with natural dyes. Mass market brands like H&M strive to produce an eco-friendly range of clothes, exchanging bright colours for the softer hues of natural dyes. Designers like Dorel Mong, looked into using hemp, possibly the greenest fabric available, but it would take the commitment of major chain stores to enable hemp to be produced and manufactured in a cost-effective and ethically sound manner. The problem with such fabrics and processes was that consumers still hankered for vibrant shades like the turquoise and shocking pink fashionable in the summers of 1967 and 1968, but lacking in eco-credentials.

Katherine Hamnett has been particularly committed to using green-cottons and other fabrics that combine both ethical production methods, and the dream of ethical consumption, with all the nostalgic ideals this embodies. In her spring/summer 1994 collection, she showed *ecole* flower dresses, with low-cut bodices covered with shiny straps, their soft beige hue the sign of natural cotton. *Mesclum* also used green-cotton the same year in his *Ernsthaft* collection, that developed his critique of fashion and consumption. He had already painted T-shirts with the slogans, 'Fashion is full of shit', and 'Stamps Symbol', as well as the environmental message

Fashion Desire And Anxiety Image And Morality In The 20th Century:

Fashion, Desire and Anxiety Rebecca Arnold, 2001 Annotation Fashion and the imagery surrounding it give us a vision of Western culture that is both enticing and alienating It flaunts capitalism s euphoric emblems of glamour and success but it also represents the underside of modern life with violence and decay becoming a theme dominating clothing design and photography This provocative book sets examples from a diverse range of designers and photographers in their cultural and historical context in order to unravel the contradictory emotions of desire and anxiety they provoke *Fashion, Desire and Anxiety* Rebecca Arnold, 2001-03-02 This text argues that fashion and the imagery surrounding it give us a vision of Western culture that is both enticing and alienating flaunting capitalism s euphoric emblems of glamour and success but also representing the underside of modern life In the 1970s photographers like Guy Bourdin and Helmut Newton set models against backdrops of tarnished glamour in the 1990s Alexander McQueen and John Galliano created decadent femmes fatales whose sexual allure was equally tempting and threatening Rebecca Arnold explores the complex nature of modern fashion attempting to unravel the contradictory emotions of desire and anxiety that it provokes **A Cultural History of Dress**

Tweed Fiona Anderson, 2016-12-15 The story of tweed is tied to a series of social economic and cultural shifts that have molded its development This book considers the historical factors that helped to shape the design characteristics and social meanings of the group of fabrics that we call tweed from their emergence in the 1820s to the present day Including significant new research on tweeds from Harris Tweed to the type used by Chanel this book follows the history of these fabrics from the raw fiber to the finished garment in men s and women s fashion Exploring rural and urban contexts this book reveals the important physical and conceptual relationships of tweed with landscape Anderson shows that contrary to their

strong popular associations with tradition tweeds emerged in the Romantic era as a response to the dramatic changes associated with industrialization and urbanization Progressive changes in gender relations are also explored as a major factor in tweed s evolution from associations with particular ideals of masculinity into what is now a truly adaptable fashion textile worn by both sexes This is the first book of its kind to recognize the importance of tweed to fashion innovation today

The Birth of Cool Carol Tulloch,2016-01-28 It is broadly recognized that black style had a clear and profound influence on the history of dress in the twentieth century with black culture and fashion having long been defined as cool Yet despite this high profile in depth explorations of the culture and history of style and dress in the African diaspora are a relatively recent area of enquiry The Birth of Cool asserts that cool is seen as an arbiter of presence and relates how both iconic and ordinary black individuals and groups have marked out their lives through the styling of their bodies Focusing on counter and sub cultural contexts this book investigates the role of dress in the creation and assertion of black identity From the gardenia corsage worn by Billie Holiday to the work wear of female African Jamaican market traders through to the home dressmaking of black Britons in the 1960s and the meaning of a polo neck jumper as depicted in a 1934 self portrait by African American artist Malvin Gray Johnson this study looks at the ways in which the diaspora experience is expressed through self image Spanning

Karlin, 2014-04-30 Gender and Nation in Meiji Japan is a historical analysis of the discourses of nostalgia in late nineteenth and early twentieth century Japan Through an analysis of the experience of rapid social change in Japan s modernization it argues that fads ry k and the desires they express are central to understanding Japanese modernity conceptions of gender and discourses of nationalism In doing so the author uncovers the myth of eternal return that lurks below the surface of

Japanese history as an expression of the desire to find meaning amid the chaos and alienation of modern times The Meiji period 1868-1912 was one of rapid change that hastened the process of forgetting The state's aggressive program of modernization required the repression of history and memory However repression merely produced new forms of desire seeking a return to the past with the result that competing or alternative conceptions of the nation haunted the history of modern Japan Rooted in the belief that the nation was a natural and organic entity that predated the rational modern state such conceptions often were responses to modernity that envisioned the nation in opposition to the modern state What these visions of the nation shared was the ironic desire to overcome the modern condition by seeking the timeless past While the condition of their repression was often linked to the modernizing policies of the Meiji state the means for imagining the nation in opposition to the state required the construction of new symbols that claimed the authority of history and appealed to a rearticulated tradition Through the idiom of gender and nation new reified representations of continuity timelessness and history were fashioned to compensate for the unmooring of inherited practices from the shared locales of everyday life This book examines the intellectual social and cultural factors that contributed to the rapid spread of Western tastes and styles along with the backlash against Westernization that was expressed as a longing for the past By focusing on the expressions of these desires in popular culture and media texts it reveals how the conflation of mother countryside everyday life and history structured representations to naturalize ideologies of gender and nationalism
