Jaszczolt,2012-07-24 This is an interdisciplinary volume that focuses on the central topic of the representation of events namely cross cultural differences in representing time and space as well as various aspects of the conceptualisation of space and time It brings together research on space and time from a variety of angles

both theoretical and methodological Crossing boundaries between and among disciplines such as linguistics psychology philosophy or anthropology forms a creative platform in a bold attempt to reveal the complex interaction of language culture and cognition in the context of human communication and interaction The authors address the nature of spatial and temporal constructs from a number of perspectives such as cultural specificity in determining time intervals in an Amazonian culture distinct temporalities in a specific Mongolian hunter community Russian specific conceptualisation of temporal relations Seri and Yucatec frames of spatial reference memory of events in space and time and metaphorical meaning stemming from perception and spatial artefacts to name but a few themes The topic of space and time in language and culture is also represented from a different albeit related point of view in the sister volume Space and Time in Languages and Cultures Linguistic diversity HCP 36 which focuses on the language specific vis vis universal aspects of linguistic representation of spatial and temporal reference   Trademark Protection and Freedom of Expression Wolfgang Sakulin,2011-01-01 Trademark law grants right holders an exclusive right to prevent third parties from using a sign This can readily be seen as the antithesis of freedom of expression which arguably includes a right of third parties to non exclusive use of a sign for a variety of purposes ranging from informing consumers to voicing criticism or to artistic expression Drawing on cultural theory and which has shown that society is involved in a constant struggle about shaping the meaning of signs including trademarks and this highly original and provocative book contends that trademark law fails to sufficiently differentiate between commercial purpose and the social political or cultural meanings carried by one and the same sign The author shows that the and functional approachand to justifying trademark rights taken in current jurisprudence and doctrine is deficient in that it does not take sufficient account of the fact that trademark rights can restrict the freedom of expression of third parties Specifically the exercise of rights granted under the European Trademark Regulation and the national trademark rights harmonized by the European Trademark Directive can cause a disproportionate impairment of the freedom of commercial and non commercial expression of third parties as protected by Article 10 of the European Convention on Human Rights ECHR The authorand s in depth analysis explores such elements as the following o the economic and ethical rationales of trademark rights o whether trademark rights under European law can be justified by these rationales o how freedom of expression can serve as a limitation to trademark rights o what level of protection such freedom of expression grants to third parties o the role of trademarks of social cultural or political importance in public discourse o chilling effects on public discourse that can be caused by the exercise of trademark rights o the interpretation of provisions regulating the grant and revocation of trademark rights in light of freedom of expression and o the interpretation of the scope of protection and the limitations of trademark rights in light of freedom of expression In effect the analysis serves to expand the focus of legislators courts and trademark registering authorities from the interests of trademark right holders who seemingly are granted ever more protection to the justified interests of third parties The critical analysis of existing trademark law leads

the author to clearly identify the areas of trademark law in which the law needs to be reinterpreted and the areas in which legislative action should be taken with recommendations for a number of limitations that should aid legislators in drafting concrete amendments The new insights and imperatives provided by this book are sure to prove useful to both courts interpreting existing provisions of trademark laws and to legislators who are faced with the challenges of drafting new rules or revising existing laws   **The Oxford Handbook of the Dead Sea Scrolls** Timothy H.
