Achieving Literacy (RLE Edu I) Margaret Meek,2013-06-17 How children learn to read well and what kind of teaching helps them is a scarcely penetrated mystery This book is a fascinating and informative research report by a group of teachers who set out to teach children who have failed to acquire a useful degree of literacy in it they discuss their experiences The authors are presenting evidence about a central and constant problem in education an essential kind of evidence which is often ignored because it is so difficult to collect and present The report presents enough case notes and recordings of lessons and discussions to allow readers to make their own interpretations alongside those of the writers Highly informative about many of the central topics of teaching literacy it discusses children s motivation the influence of social and cultural background on learning and different methods of teaching reading

**Being Skilled** Stuart McNaughton,2017-11-03 Originally published in 1987 Being Skilled presents a new model of how children learn to read and in particular those who learn quickly and precociously Bringing together ideas from such diverse sources as cognitive and developmental psychology and behaviour analysis perspectives on learning Stuart

McNaughton has produced a more complete theory based on a study of homes and classrooms and the characteristics of reading behaviour in these settings Within this theory reading is seen as a symbolic skill with structural properties that partly determine development but it is also a social practice in which learning is achieved through problem solving and the performing of tasks set by particular environments Drawing on extensive research carried out in Britain North America and Australasia McNaughton examines how interactions between teacher and child direct the task of learning to read and how the relationship between home and school can be a well matched or a poorly matched setting in which learning may occur Being Skilled will appeal to advanced students researchers and theorists in education and development psychology and to anyone interested in the learning of complex skills
