Traditional and Modern Natural Resource

Management in Latin America Francisco J. Pichon, John Frechione, Jorge E. Uquillas, 1999-10-15 Traditional and Modern Natural Resource Management in Latin America identifies a major problem facing developing nations and the countries and sources that fund them the lack of attention and or effective strategies available to prevent farmers in underdeveloped and poorly endowed regions from sinking still deeper into poverty while avoiding further degradation of marginal environments The contributors propose an alliance of scientific knowledge with native skill as the best way to proceed arguing that folk systems can often provide effective management solutions that are not only locally effective but which may have the potential for spatial diffusion While this has been said before the volume makes one of the best articulated statements of how to implement such an approach In this book which stems from a workshop held in 1995 at the World Bank the editors make an eloquent case for the relevance of risk prone areas as a subject of study and the special role that indigenous knowledge plays in such poorly endowed regions The volume is balanced it does not advocate one approach over another and it is multidisciplinary including work by anthropologists sociologists geographers and natural scientists The nine chapters create a natural progression from conceptual issues to theory applications and synthesis and contain a wealth of data analyses recommendations and carefully considered opinions by experts who have been intimately involved over the long term in theoretical and practical work related to systems of natural resource management in Latin America The volume addresses the topic of sustainability in a logical manner considering practical concerns and lessons as well as theoretical perspectives A number of conceptual and case studies highlight approaches that might succeed if World Bank and other multilateral and national funding sources are forthcoming Traditional and Modern Natural Resource Management in Latin America addresses a topic that has gained worldwide interest especially in relation to indigenous knowledge systems

Indigenous

Management of Wetlands Alan Dixon, 2018-02-06 This title was first published in 2003 There has been increasing recognition around the world that wetlands are fragile ecosystems which require sensitive and sustainable management if they are to continue to provide their range of functions and benefits These functions and benefits which include contributions to food security and environmental regulation play a critical role in sustaining rural livelihoods in many developing countries Drawing upon research carried out in the area this book identifies and discusses the importance of wetlands to local

communities in south west Ethiopia and in particular how indigenous wetland management practices contribute to sustainable wetland use As the basis of wetland management particular attention is paid to the role of Indigenous Knowledge Systems and how knowledge of wetland functioning is acquired disseminated developed and applied by local communities in their wetland management strategies Critically this community knowledge is examined in the context of scientific data specifically that obtained from a wetland hydrology monitoring programme thereby drawing attention to the strengths and weaknesses of both systems This has major implications not only for the ways in which wetlands and other natural resources are managed at the local level but also for the wider rural development strategies of governments and non governmental organizations

Central-Local Relations in Asia-Pacific Mark Turner,2016-07-27 A source of perennial tension in states is the degree to which decision making power and authority should be concentrated in central institutions and individuals At present the conventional wisdom of central local relations has swung in favour of decentralisation This book investigates whether such convergence is taking place through detailed examination in Asia Pacific The results of the survey reveal a complex picture in which divergence is still evident in the region s patterns of central local relations

Policies for a Small Planet Johan Holmberg,2019-06-26 First published in 1992 The world is not living within its means Current development policies in both industrial and developing countries are wasting resources and destroying the commons on which we all depend The world is set on a path of deepening poverty and a deteriorating environment New policies are needed to achieve sustainable development This book presents an integrated series of essays on the policies for sustainable development from one of the leading policy research institutes on environment and development issues It concentrates on the developing world and looks at the specific sectors to which the policies have to be applied Beginning with a discussion of what constitutes sustainable development it goes on to deal with the institutional arrangements needed to mobilise human resources for change and the economic policies for sustainable natural resource management It then examines the policies needed in agriculture urban development industry forests drylands energy use finance population and consumption Throughout it demonstrates how those directly involved are best placed to manage their environments and resources Policies must support the experience and resourcefulness of local people Sustainable development requires that they control their own futures This title will be of great interest to students of Environmental Studies

Living Farms Martin Whiteside,2014-04-23 Designed as an accessible text on sustainable agriculture this book contains information on community organization and participation technologies for sustainability and the wider policy and service environment The book looks at a variety of ways of encouraging sustainability through policy change and service provision including ways of improving financial services ways of improving land security and ways of improving training The book is illustrated by a range of case studies and examples and contains lists of contact addresses

Forests and Rural Development Jürgen Pretzsch,Dietrich Darr,Holm Uibrig,Eckhard Auch,2014-01-21 This book provides an overview of the complex challenges and opportunities

related to forest based rural development in the tropics and subtropics Applying a socio ecological perspective the book traces the changing paradigms of forestry in rural development throughout history summarizes the major aspects of the rural development challenge in forest areas and documents innovative approaches in fields such as land utilization technology and organizational development rural advisory services financing mechanisms participative planning and forest governance It brings together scholars and practitioners dealing with the topics from various theoretical and practical angles Calling for an approach that carefully balances market forces with government intervention the book shows that forests in rural areas have the potential to provide a solid foundation for a green global economy Alternative Development Strategies in SubSaharan Africa Frances Stewart, Sanjaya Lall, Samuel M. Wangwe, 1992-06-18 The World Bank and the IMF dominate policy making in Africa today This book considers the consistency between their adjustment policies and long run development needs with an analysis of country experience An alternative development strategy is proposed
