Extensions Of Positive Definite Distributions And Maximum Entropy Memoirs Of The American Mathematical Society 489:

Extension of Positive-Definite Distributions and Maximum Entropy Jean-Pierre Gabardo, 1993 In this work the maximum entropy method is used to solve the extension problem associated with a positive definite function or distribution defined on an interval of the real line Garbardo computes explicitly the entropy maximizers corresponding to various logarithmic integrals depending on a complex parameter and investigates the relation to the problem of uniqueness of the extension These results are based on a generalization in both the discrete and continuous cases of Burg's maximum entropy theorem

Categories of Modules over Endomorphism Rings Theodore Gerard Faticoni, 1993 It is the goal of the memoir to develop a functorial transfer of properties between italic capital A and script capital M subscript italic capital E the category of modules over italic capital E that is more sensitive than the traditional starting point $\text{Hom italic capital A}$ This memoir should be accessible to anyone who has a working knowledge of rings modules functors and categories equivalent to that gained by reading Anderson and Fuller's text *Rings and Categories of Modules* Approximation and Optimization in the Caribbean II, 1995 The volume contains original articles and survey papers on approximation theory e.g. approximation by polynomial and rational functions approximation by operators orthogonal polynomials meromorphic functions optimization e.g. integer nonlinear quadratic multi objective fractional semi infinite control theory e.g. singular control problems equations and inequalities e.g. complexity mathematical economy e.g. core theory infinite horizon economics and shows the relations among these topics *American Book Publishing Record Cumulative 1993* R R Bowker Publishing, 1994-03 Cited in BCL3 Sheehy and Walford Compiled from the 12 monthly issues of the ABPR this edition of the annual cumulation lists by Dewey sequence some 41 700 titles for books published or distributed in the US Entry information is derived from MARC II tapes and books submitted to R R Bowker and *Forthcoming Books* Rose Army, 1993-04 **Whitaker's Books in Print**, 1998
