Aylward,2025-07-17T00:00:00Z The growth of the Critical Race Theory genre began in Canada when scholars of colour in Canada began to articulate a dissatisfaction with the existing Canadian legal discourse which failed to include an analysis of the role that race and racism has played in the political and legal structures of Canadian society This book is about the role that race and racism play in the theory and practice of law It shows how Canadian Black lawyers and others are beginning to seriously consider the role of race in litigation and to develop critical race litigation strategies to address the issue The author documents how a growing body of work designed to move us beyond theory to practical application is being developed to help recognize the complex relationships among race racism and the law      *Methodological Issues in Psychology* David Trafimow,2023-08-17 *Methodological Issues in Psychology* is a comprehensive text that challenges current practice in the discipline and provides solutions that are more useful in contemporary research both basic and applied This book begins by equipping the readers with the underlying foundation pertaining to basic philosophical issues addressing theory verification or falsification distinguishing different levels of theorizing or hypothesizing and the assumptions necessary to negotiate between these levels It goes on to specifically focus on statistical and inferential hypotheses including chapters on how to dramatically improve statistical and inferential practices and how to address the replication crisis Advances to be featured include the author's own inventions the a priori procedure and gain probability diagrams and a chapter about mediation analyses which explains why such analyses are much weaker than typically assumed The book also provides an introductory chapter on classical measurement theory and expands to new concepts in subsequent chapters The final measurement chapter addresses the ubiquitous problem of small effect sizes in psychology and provides recommendations that directly contradict typical thinking and teaching in psychology but with the consequence that researchers can enjoy dramatically improved effect sizes *Methodological Issues in Psychology* is an invaluable asset for students and researchers of psychology It will also be of vital interest to social science researchers and students in areas such as management marketing sociology and experimental philosophy      **Lateral Thinking for Every Day** Paul Sloane,2023-01-03 Not every problem has an obvious solution Utilize the power of lateral thinking to think imaginatively and creatively to tackle everyday problems in a new fresh way Lateral thinking is about re thinking your approach to problem solving and using an indirect method to come up with innovative results But how easy is it to do it In *Lateral Thinking for Every Day* acclaimed writer Paul Sloane clearly explains how you can benefit from using a lateral thinking approach Using inspiring examples from great lateral thinkers including

Media and Genre Ivo Ritzer,2022-01-02 This book reflects and analyzes the relationship between media and genre focusing on both aesthetics and discursive meaning It considers genres as having a decisive impact on media cultures either in film on TV in computer games comics or radio on the level of production as well as reception The book discusses the role of genres in media and cultural theory as a configuration of media artifacts that share specific aesthetic characteristics It also reflects genre as a concept of categorization of media artifacts with which the latter can be analyzed under terms depending on a specific historical situation or cultural context A special focus is placed on trans media perspectives Even as genres develop their own traditions within one medium they reach beyond a media specific horizon necessitating a double perspective that considers the distinct recourse to genre within a medium as well as the trans media circulation and adaption of genres
