**Exultant** Stephen Baxter, 2004-10-26 Baxter has an uncanny gift for mixing a punchy cyberpunk cynicism with his resolutely hard SF story base. *Exultant* rivals Asimov in its boundless vision for the future evolution of humanity. Kirkus Reviews starred review. For more than twenty thousand years humans have been at war with the alien race of Xeelee. Faced with certain death, a young pilot Pirius disobeys orders and travels into the future. Upon his return, Pirius is court-martialed and sentenced to penal servitude. But it is not only Pirius who pays the price. In flying into the future and back again, Pirius returned to a time before he'd left, a time inhabited by his younger self who also receives punishment. Commissary Nilis believes that the elder Pirius, whom he dubs Pirius Blue, may know how to defeat the Xeelee. But Nilis can do nothing for Pirius Blue. Instead, he takes the younger Pirius, Pirius Red, back to Earth. There, Pirius Red will discover truths that shatter his preconceived notions of all that he is fighting for, while Pirius Blue will learn even harsher truths. But the most shocking revelation of all is still to come. Absurdly ambitious, technically brilliant, and downright exciting. SFX Magazine. Striking chilling with a triumphant conclusion. Starburst. Exultant Stephen Baxter, 2004. Set 25,000 years from now. *EXULTANT* takes mankind into a millennial war for the control of the galaxy itself. A war against the unknowable, utterly alien Xeelee. Now the war has reached the galaxy's hot core, the Xeelee stronghold, and impossibly it seems that a final victory may be at hand. It is a victory that will rely on mankind's latest warriors. In a war for survival, you are expected to live bravely and die young for the good of the greater. A massive selective breeding campaign has led to the best solution: child soldiers. But the Xeelee predate man by millions of years, and they will not be easily beaten. *EXULTANT* is an epic dark novel of a savage future. It is at once a warning about the dangers of winning whatever the cost and a hugely impressive piece of SF. **Firstborn** Arthur C. Clarke, Stephen Baxter, 2008-10-28. The Firstborn, the mysterious race of aliens who first became known to science fiction fans as the builders of the iconic black monolith in 2001. A Space Odyssey have inhabited. Legendary master of science fiction. Sir Arthur C. Clarke's writing for decades. With *Time's Eye* and *Sunstorm*, the first two books in their acclaimed *Time Odyssey* series. Clarke and his brilliant co-author Stephen Baxter imagined a near future in which the Firstborn seek to stop the advance of human civilization by employing a technology indistinguishable from magic. Their first act was the Discontinuity, in which Earth was carved into sections from different eras of history, restitched into a patchwork world, and renamed Mir. Mir's inhabitants included such notables as Alexander the Great, Genghis Khan, and United Nations peacekeeper Bisesa Dutt. For reasons unknown to her, Bisesa entered into communication with an alien artifact of inscrutable purpose and godlike power, a power that eventually returned her to Earth. There, she played an instrumental role in humanity's race against time to stop a doomsday event: a massive solar storm triggered by the alien Firstborn, designed to eradicate all life from the planet. That fate was averted at an inconceivable price. Now, twenty-seven years later, the Firstborn are back. This time, they are pulling no punches. They have sent a quantum bomb. Speeding toward Earth, it is a device that human scientists can barely comprehend.

that cannot be stopped or destroyed and one that will obliterate Earth Bisesa's desperate quest for answers sends her first to Mars and then to Mir which is itself threatened with extinction The end seems inevitable But as shocking new insights emerge into the nature of the Firstborn and their chilling plans for mankind an unexpected ally appears from light years away

**Close Encounters of the Invasive Kind** Sarah Seymore, 2013 Before the breakthrough of postcolonial studies British science fiction authors already saw the opportunity to discuss political and ethical issues of imperialism by projecting human history and behavior onto the alien Other In this thesis the case studies of 15 novels of alien encounter science fiction illuminate the treatment of colonial and postcolonial concepts such as colonialism neo colonialism Empire paternalism hybridity mimicry and science and technology as a means of conquest and resistance The analysis also shows that the Empire is still a vital background for British science fiction Thesis Series Anglistik Amerikanistik English American Studies Vol 35

**The Science of Avatar** Stephen Baxter, 2012-05-29 Audiences around the world have been enchanted by James Cameron's visionary Avatar with its glimpse of the Na'vi on the marvelous world of Pandora But the movie is not entirely a fantasy there is a scientific rationale for much of what we saw on the screen from the possibility of travel to other worlds to the life forms seen on screen and the ecological and cybernetic concepts that underpin the neural networks in which the Na'vi and their sacred trees are joined as well as to the mind linking to the avatars themselves From popular science journalist and acclaimed science fiction author Stephen Baxter The Science of Avatar is a guide to the rigorous fact behind the fiction It will enhance the readers enjoyment of the movie experience by drawing them further into its imagined world Xeelee:
