**Creation and Evolution** Alan Hayward, 2005-01-26 Even non Christian scientists are attacking the traditional evolutionary theory still taught in many schools as fact In Creation and Evolution British physicist Dr Alan Hayward draws evidence solely from these non Christian researchers to discredit gradual evolution and Darwin s mechanism of natural selection Hayward also examines in detail young earth theories flood geology and geological testimony to an ancient earth In the end he suggests a surprising interpretation of Genesis that argues for both a historical Adam and

**Of The Hurricane** Richard Bellman,1984-06-01 This is a very frank and detailed account by a leading and very active mathematician of the past decades whose contributions have had an important impact in those fields where mathematics is now an integral part It starts from his early childhood just after the First World War to his present day positions as professor of mathematics electrical engineering and medicine at the USC which in itself reflects on the diversity of interests and experiences gained through the turbulent years when American mathematics and sciences established themselves on the forefront The story traces the tortuous path Bellman followed from Brooklyn College the University of Wisconsin to Princeton during the war years more than a decade with the RAND Corporation with frequent views of more than just the academic circles including his experiences at Los Alamos on the A bomb project Bellman gives highly personalised views of key personalities in mathematics physics and other areas and his motivations and the forces that helped shape dynamic programming and other new areas which emerged as consequences of fruitful applications of mathematics *Kurt Gödel:*

Laboratory of Dr. Weigl: How Two Brave Scientists Battled Typhus and Sabotaged the Nazis Arthur Allen,2014-07-21 Thought provoking Allen writes without sanctimony and never simplifies the people in his book or the moral issues his story inevitably raises Wall Street Journal Few diseases are more gruesome than typhus Transmitted by body lice it afflicts the dispossessed refugees soldiers and ghettoized peoples causing hallucinations terrible headaches boiling fever and often death The disease plagued the German army on the Eastern Front and left the Reich desperate for a vaccine For this they turned to the brilliant and eccentric Polish zoologist Rudolf Weigl In the 1920s Weigl had created the first typhus vaccine using a method as bold as it was dangerous for its use of living human subjects The astonishing success of Weigl s techniques

attracted the attention and admiration of the world giving him cover during the Nazi s violent occupation of Lviv His lab soon flourished as a hotbed of resistance Weigl hired otherwise doomed mathematicians writers doctors and other thinkers protecting them from atrocity The team engaged in a sabotage campaign by sending illegal doses of the vaccine into the Polish ghettos while shipping gallons of the weakened serum to the Wehrmacht Among the scientists saved by Weigl who was a Christian was a gifted Jewish immunologist named Ludwik Fleck Condemned to Buchenwald and pressured to re create the typhus vaccine under the direction of a sadistic Nazi doctor Erwin Ding Schuler Fleck had to make an awful choice between his scientific ideals or the truth of his conscience In risking his life to carry out a dramatic subterfuge to vaccinate the camp s most endangered prisoners Fleck performed an act of great heroism Drawing on extensive research and interviews with survivors Arthur Allen tells the harrowing story of two brave scientists a Christian and a Jew who put their expertise to the best possible use at the highest personal danger *Short Stories* ,1903 *Sun in a Bottle* Charles Seife,2008 Chronicles the last half century s haphazard attempt to harness fusion energy describing how governments and research teams throughout the world have employed measures ranging from the controversial to the humorous **The Last Voice** José Ignacio Latorre,María Teresa Soto-Sanfiel,2023-10-02 Most human beings don t manage to achieve fame Roy J Glauber did so for two different reasons Glauber was not only a Nobel Prize winning physicist but also one of the last surviving scientists who worked in Los Alamos in the Theoretical Division of the Manhattan Project He was a witness to all the events and knew all the scientists associated with the creation and launch of the first atomic bombs This book is the product of a series of long interviews held with Roy over three years in Benasque Spain in 2011 and later in Singapore and Cambridge USA Its pages give a first hand account of a true protagonist one who is independent lucid sagacious and committed to the truth The authors have respectfully preserved his spirit his voice is the one that matters The authors asked the questions and they relay his answers Their comments are confined to the footnotes and to brief explanatory paragraphs added simply to provide certain relevant details The importance of the events that Glauber describes here is indisputable as therefore is the book itself The events narrated in its pages will remain part of world history perhaps for centuries or even millennia We live today in the shadow of the decisions made at that time **Metamagical Themas** Douglas R Hofstadter,2008-08-04 Hofstadter s collection of quirky essays is unified by its primary concern to examine the way people perceive and think Project Orion George Dyson,2003-04 Project Orion describes one of the most awesome might have beens and may yet bes of the space age This is essential reading for anyone interested in government bureaucracies and the military industrial complex Sir Arthur C Clarke **The Neuropsychology of High-level Vision** Martha J.
