Eye In The Sky Alternate Universe:

Eyes in the Sky Andrew May,2024-01-18 Over 50 years ago astronomers launched the world's first orbiting telescope to gaze further into outer space to examine anything that appears in the sky above our heads from comets and planets to galaxy clusters and stars Since then almost 100 space telescopes have been launched from Earth and are orbiting our planet with 26 still active and relaying information back to us As a result of these space based instruments such as NASA's iconic Hubble Space Telescope we know much more about the universe now than we did half a century ago But why is Hubble orbiting just 540 kilometres above the Earth so much more effective than a ground based telescope How can a glorified camera tell us not only what distant objects look like but their detailed chemical composition and three dimensional structure as well In *Eyes in the Sky* science writer Andrew May takes us on a journey into space to answer these questions and more by looking at the development of revolutionary instruments such as Hubble and the James Webb Space Telescope exploring how such

The Multiverse as Theory in Postmodern Speculative Fictional Narratives Angélica Cabrera Torrecilla, Francisco Sáez de Adana, 2024-11-15 The Multiverse as Theory in Postmodern Speculative Fictional Narratives considers the concept of the multiverse beyond the immediacy of being merely an excuse or scenario for the development of stories instead positioning the multiverse as a theoretical method in which speculative fiction narratives can explore diverse issues to bridge ideas across cultural social and philosophical analysis Taking a cross cultural approach the book centres around the critical engagements that literary and media texts have with the representations of the multiverse beyond considering this subject as a mere rhetorical flourish or a passing fad A diverse and international team of authors engage with the multiverse from the point of view of other worlds understanding it not as the appearance of another independent world but as the collision of two or more different worlds into one of them From this key finding the multiverse encourages us to pay attention to the influence that fiction exerts on narratives and world building providing possible frameworks to rethink critical aspects of temporality space self society and culture in contemporary times This pioneering work will interest students and scholars working in the areas of media and cultural studies comparative literature popular culture studies speculative fiction and transmedia studies
