The Wright Flyers 1899-1916 Richard P. Hallion,2019-12-26 Orville and Wilbur Wright two bicycle making brothers from Dayton Ohio secured their place as the most famous names in aviation history when on December 17 1903 they made the first powered controlled and sustained heavier than air flight But their success over the cold and windswept Carolina dunes that day has overshadowed their many other accomplishments before and after that historic flight The Wrights progression from theory to analysis to ground testing components and wing shapes and then to flight testing kites gliders and their first

powered aeroplane marked the world's first successful X-Plane research and development programme. They established a template all subsequent aircraft have followed, one still relevant in the era of hypersonic flight and drone research. This book traces the Wright Brothers' story from their first success on that cold December day throughout their glory years to their eventual eclipse by other aviators. It explores in detail the process that led them to their pioneering craft and their many subsequent achievements over the following years and highlights their enduring importance in the age of modern flight.
