Geoproperty Foreign Affairs National Security And Property Rights:

Geoproperty Geoff Demarest, 2014-04-08 Some innovations create new strategic property and new conflicts Demarest argues that we have not reached the end of history and modern man will continue to fight over property as before but the property will be of a post modern character such as electronic wavelengths and genetic codes **Geopolitics at the End of the Twentieth Century** Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs

Boundaries, Territory and Postmodernity David Newman, 2013-11-05 Contributions to this collection seek to determine the extent to which states and boundaries have in fact disappeared or are simply changing their functions as we move from an era of fixed territories into a post Westphalian territorial system A group of international political geographers and political scientists examine the changing nature of the state pointing to significant changes on the one hand but equally noting the continued importance of territory and boundaries in determining the political ordering of the post modern world

The Post-Heroic Presidency Michael A. Genovese, Todd L. Belt, 2016-06-13 This book examines how presidents from Nixon to Obama have faced the challenges of global leadership in a dramatically changing world one with more limited resources and an increasing number of threatening challengers The immediate post World War II era was undeniably a period of American power and influence Even during the Cold War the United States was the leader of the West exerting wide ranging power internationally But beginning with the Vietnam War America began experiencing a series of setbacks and challenges to its power The Post Heroic Presidency Leveraged Leadership in an Age of Limits examines how U S presidents have attempted to reverse or contend with this new era of limited power in which presidential leadership is hamstrung due to an increasingly globalized and interdependent world one where power is more diffuse and the system of checks and balances bind a president in an age of hyper partisanship The book examines presidents of the 20th and 21st centuries explaining how the first U S president to confront this new age was Richard Nixon who along with Henry Kissinger developed a sophisticated approach to deal with the recalibration of American power It documents how other recent presidents have either tried to make peace with limited power Jimmy Carter reverse the decline Ronald Reagan ignore the

implications of limits George W Bush or find ways to lead that were less ambitious more prudent and less unilateral George H W Bush Bill Clinton and Barack Obama In the cases of Clinton and Obama this shift to using soft power persuasion and multilateralism earned them criticism that they are weak thereby undermining their efforts to lead both at home and abroad

Mapping Colombia: The Correlation Between Land Data and Strategy , Weaponizing Maps Joe Bryan, Denis Wood, 2015-03-11 Maps play an indispensable role in indigenous peoples efforts to secure land rights in the Americas and beyond Yet indigenous peoples did not invent participatory mapping techniques on their own they appropriated them from techniques developed for colonial rule and counterinsurgency campaigns and refined by anthropologists and geographers Through a series of historical and contemporary examples from Nicaragua Canada and Mexico this book explores the tension between military applications of participatory mapping and its use for political mobilization and advocacy The authors analyze the emergence of indigenous territories as spaces defined by a collective way of life and as a particular kind of battleground Geopolitics and International Relations , 2021-12-13 Although we live in a globalised world territorially embedded factors are highly relevant in such domains as security economy energy environment politics diplomacy Today s analysts of world affairs are often loosely referring to geopolitics but do not always clearly define it This book therefore offers a necessary framework an introduction into the main components of geopolitical analysis an overview of the main geopolitical schools of thought as well as reflections on how technology and geopolitics affect each other in economy energy and security In addition several empirical studies are showcased each developing innovative approaches Leading authors reflect upon containment analyse geopolitical myths research geoeconomic rivalries study mental maps analyse conflict through territorially embedded variables greed motivations and apply neo medievalism to study sub state diplomacy Contributors include David Criekemans Gyula Csurgai Luis da Vinha Manuel Duran Alexandre Lambert Antonios Nestoras and Steven Spittaels Kosovo Mary Buckley, Sally Cummings, 2001-01-01 Nato intervention in Kosovo marked a major turning point in post cold war international relations While some western commentators argued that it was the first war to be fought on purely moral grounds Serbian Russian and Chinese assessments were sharply different This highly original addition to the literature on Kosovo highlights the importance of perspective to an understanding of both the causes and consequences of war It makes clear that the conceptual lenses paradigms or frameworks through which political actors view reality in turn affect their understanding of the behaviour of others and their reactions to it The authors a team of regional experts on the countries covered examine the way the war has been understood in countries involved in and peripheral to the conflict Their aim is to provide a broad yet highly nuanced picture of this focal point of Balkan unrest The book opens with an introduction to the historical and regional context of the conflict The authors go on to present twelve case studies ranging from Serbia and the other former Yugoslav republics to the USA and to China These detailed regional studies highlight the considerable variation in the key states perceptions of their national interest and their perceptions of what constitutes legality or

legitimacy In each case domestic constraints are explored and the ways in which differing perspectives of political and military leadership fed into the crisis are examined Further thematic chapters determine the war s consequences and the lessons to be drawn in terms of the wider issues of refugees humanitarian intervention European security and geopolitics

Geopolitics, Geography and Strategy Colin S. Gray, Geoffrey Sloan, 2014-01-14 Geopolitical conditions influence all strategic behaviour even when cooperation among different kinds of military power is expected as the norm action has to be planned and executed in specific physical environments The geographical world cannot be avoided and it happens to be organized into land sea air and space and possibly the electromagnetic spectrum including cyberspace Although the meaning of geography for strategy is a perpetual historical theme explicit theory on the subject is only one hundred years old Ideas about the implication of geographical especially spatial relationships for political power which is to say geopolitics flourished early in the twentieth century Divided into theory and practice sections this volume covers the big names such as Mackinder Mahan and Haushofer as well as looking back at the vital influence of weather and geography on naval power in the long age of sail sixteenth to nineteenth centuries It also looks forward to the consequences of the revival of geopolitics in post Soviet Russia and the new space based field of astropolitics Constructing Post-Soviet Geopolitics in Estonia Pami

Aalto, 2013-09-13 This work examines the construction of post Soviet political space geopolitical discourses and boundaries in Estonia Making use of innovative methodological solutions such as Q methodology its analysis includes in depth interviews that elucidate a variety of issues through human experience and subjective perception such as Estonian Russian border disputes of the 1990s inter ethnic issues and national integration and security As Estonia is one of the frontline EU accession countries and is queuing for membership of NATO the book raises broad questions of post Soviet geopolitics in the Baltic region and across Europe Indeed Pami Aalto argues that small states such as Estonia should be understood as active participants in post Soviet and European geopolitics and not simply pawns in a superpower environment *Geopiracy* Joel Wainwright, 2012-10-30 Geopiracy is a study of the Bowman expeditions a project through which geographers with funding from the US Army are mapping the human terrain of foreign lands Wainwright offers a critique of human geography today that draws on contemporary social theory to raise unsettling questions about the nature of geography s disciplinary formation

From Geopolitics to Global Politics Jacques Lévy, 2014-04-04 Addressing the weakening of the nation state and the globalizing tendencies of the 21st century this compilation of writings looks at international wars boundaries cultural conflict and world economy in a bid to address the changing relationship between politics and geography **The Changing**

Geopolitics of Eastern Europe Dr A H Dawson, Rick Fawn, 2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe including some of those which are hoping to enter the European Union in the near future some for which entry is far off and some which may never seek or be eligible for membership The

Marshall Plan Today John Agnew, J. Nicholas Entrikin, 2004-06-24 This volume has as its focus the role of the Marshall Plan as

both a force in the transformation of European Economic practices and a stimulus to political integration in Europe This organizing theme is framed in terms of two other issues that are central to contemporary debates in international political economy and geopolitical studies the origins and development of the Cold War and the growing globalisation of the world economy In relating the Marshall Plan to these issues this book goes beyond the typical diplomatic history approach to place the Plan in the context of both the political economy of late twentieth century Europe and the impact of American models of business and government that came with the Plan **Military Review**, 2001 **Geopolítica y alimentos** Juan José Borrell, 2024-09-23 El suministro alimentario es un asunto vital para la geopolítica mundial En las últimas décadas la competencia internacional por los recursos naturales ha generado la inclusión de los alimentos en ponderaciones estratégicas y de seguridad de potencias centrales y emergentes En un mundo donde una de cada nueve personas padece de hambre crónica y se espera que para el año 2050 su población aumente a más de 9 300 millones cobra significativa importancia analizar los factores geopolíticos que condicionan el suministro alimentario El sistema agroalimentario mundial hegemonizado por EE UU desde la Guerra Fría ha estado sujeto a un proceso de reconfiguración estructural por el efecto de una difusión mundial del poder desde comienzos del siglo XXI En paralelo países en desarrollo acentuaron la tendencia hacia una periférisación lo cual implica posicionamientos subordinados al circuito agroalimentario y la vulneración de las condiciones para que la población local alcance la seguridad alimentaria El caso de Argentina durante 1996-2016 es referencial Desde una perspectiva realista este libro contribuye a formar una mirada crítica y a develar mitos sobre los desafíos y las tendencias a futuro en materia agroalimentaria **Peace Research Abstracts Journal**, 2000 **Strateji ve Jeopolitik** Bilal Karabulut, Revisiting National Security Prabhakaran Paleri, 2022-05-10 This book examines the evolving concept of national security and how human systems could be governed in an ever turbulent and dynamic world It takes a revised look at the concept of national security previously researched and identified by the author based on the present context but with a futuristic appreciation of governance primarily national but extended to global perspectives in the modern and dynamically shifting world The book emphasises the need for governments to maximise national security for the well being of their people The concept of national security is taken as the key subject of national governance which is extendable to global governance wherein national security is not only the physical or military security alone but also the overall well being of the people of a nation This book explores how national security can be achieved by balancing its various elements in different terrains where the game of governance is played in national as well as global perspective It also presents additional findings and observations to show that the approach is transformative redefining the key knowledge paradigms This book is relevant for policy makers students researchers and academics who wish to explore and rethink their approach towards governing the human systems whose well being is the responsibility of governments **ESTUDIANDO LA CONTRAINSURGENCIA DE ESTADOS UNIDOS** Gilberto López y Rivas, 2020-09-15 La Escuela de Ciencia Política y la Escuela de Historia de La
