Fantasies of Precision Ashley Lazevnick, 2023-07-11 Redefining the artistic movement that helped shape American modernism In the early decades of the twentieth century a loose contingent of artists working in and around New York City gave rise to the aesthetic movement known as precisionism primarily remembered for its exacting depictions of skyscrapers factories machine parts and other symbols of a burgeoning modernity Although often regarded as a singular group these artists were remarkably varied in their subject matter and stylistic traits *Fantasies of Precision* excavates the surprising ties that connected them exploring notions of precision across philosophy technology medicine and many other fields Bookended by discussions of the landmark First Biennial Exhibition of Painting at the

Whitney Museum in 1932 this study weaves together a series of interconnected chapters illuminating the careers of Charles Sheeler Georgia O Keeffe and Charles Demuth Built on a theoretical framework of the writing of modernist poets Marianne Moore and William Carlos Williams *Fantasies of Precision* outlines an ethos of precision that runs through the diverse practices of these artists articulating how the broad range of enigmatic imagery they produced was underpinned by shared strategies of restraint humility and slowness Questioning straightforward modes of art historical classification Ashley Lazevnick redefines the concept that designated the precisionist movement Through its cross disciplinary approach and unique blend of historiography and fantasy *Fantasies of Precision* offers a comprehensive reevaluation of one of the defining movements of artistic modernism [Chimneys and Towers](#) Betsy Fahlman, Claire Barry, Charles Demuth, 2007-09-05 *Chimneys and Towers* focuses on Demuth s late paintings of industrial sites in Lancaster Depicting the warehouses and factories of the city s tobacco and linoleum industries in sharp geometric forms these paintings bring to the depiction of his hometown the style of the American avant garde that he helped create **Georgia O'Keeffe** René Paul Barilleaux, Sarah Whitaker Peters, Georgia O'Keeffe, 2006 Georgia O Keeffe 1887 1986 has become one of America s best known artists This book which accompanies an exhibition of the same name centers on O Keeffe s efforts to ensure proper conservation of the fragile surfaces of her paintings of bones flowers and landscapes Based on previously unpublished correspondence between O Keeffe and distinguished conservator Caroline Keck this catalogue from the Mississippi Museum of Art presents entirely new information about the relationship between O Keeffe s aesthetic vision and her distinctive handling of paint and pastel O Keeffe s use of color has long been regarded as a source of the great emotional power that animates her abstract renderings of natural forms But little was known about her techniques because she surrounded her studio practices with a wall of secrecy Her correspondence with Keck reveals that she was surprisingly traditional sometimes making her own color chips and pastel sticks and even at times grinding her own pigments The essays in *Georgia O Keeffe Color and Conservation* consider the artist s enduring love of the very substance of color Through close analysis of paintings and pastels with a continuous history of conservation the essays document O Keeffe s and Keck s painstaking efforts to restore damaged art to its original state The discussion and accompanying illustrations will give readers an expanded understanding of the subtle beauty and diversity of O Keeffe s painting methods **The Living Line** Robin Veder, 2015-04-07 Robin Veder s *The Living Line* is a radical reconceptualization of the development of late nineteenth and early twentieth century American modernism The author illuminates connections among the histories of modern art body cultures and physiological aesthetics in early twentieth century American culture fundamentally altering our perceptions about art and the physical and the degree of cross pollination in the arts *The Living Line* shows that American producers and consumers of modernist visual art repeatedly characterized their aesthetic experience in terms of kinesthesia the sense of bodily movement They explored abstraction with kinesthetic sensibilities and used abstraction to achieve kinesthetic goals In fact the formalist approach to

art was galvanized by theories of bodily response derived from experimental physiological psychology and facilitated by contemporary body cultures such as modern dance rhythmic gymnastics physical education and physical therapy Situating these complementary ideas and exercises in relation to enduring fears of neurasthenia Veder contends that aesthetic modernism shared industrial modernity's objective of efficiently managing neuromuscular energy In a series of finely grained and interconnected case studies Veder demonstrates that diverse modernists associated with the Armory Show the Societe Anonyme the Stieglitz circle especially O Keeffe and the Barnes Foundation participated in these discourses and practices and that kinesthetic modernism greatly influenced the formation of modern art in America and beyond This daring and completely original work will appeal to a broad audience of art historians historians of the body and American culture in general *Between God and Man* Francesco Buranelli, Marco Bussagli, Cecilia Sica, Roberta Bernabei, 2007 How Italian artists have represented one of the most revered religious images the angel Historical Perspectives in the Conservation of Works of Art on Paper Margaret Holben Ellis, 2015-02-01 This book is the seventh in the Readings in Conservation series which gathers and publishes texts that have been influential in the development of thinking about the conservation of cultural heritage The present volume provides a selection of more than ninety five texts tracing the development of the conservation of works of art on paper Comprehensive and thorough the book relates how paper conservation has responded to the changing place of prints and drawings in society The readings include a remarkable range of historical selections from texts such as Renaissance printmaker Ugo da Carpi's sixteenth century petition to the Venetian senate on his invention of chiaroscuro Thomas Churchyard's 1588 essay in verse A Sparke of Friendship and Warne Goodwill and Robert Bell's 1773 piece Observations Relative to the Manufacture of Paper and Printed Books in the Province of Pennsylvania These are complemented by influential writings by such figures as A H Munsell Walter Benjamin and Jacques Derrida along with a generous representation of recent scholarship Each reading is introduced by short remarks explaining the rationale for its selection and the principal matters covered and the book is supplemented with a helpful bibliography This volume is an indispensable tool for museum curators conservators and students and teachers of the conservation of works of art on paper
