garage Donald Robinson's obsession with the pocket kangaroo developed into a lifelong passion and second career. Soon the Annapolis trained Navy commander was breeding gerbils and writing about them for publications ranging from the ever bouncy Highlights for Children to the erudite Science News. To support his burgeoning business the family eventually settled on a remote hundred acre farm with horses, sheep, pygmy goats, peacocks and nearly nine thousand gerbils. From part time model for her father's bestselling pet book How to Raise and Train Pet Gerbils to full time employee in the gerbil empire's complex of prefab Sears buildings, Holly was an enthusiastic if often exasperated companion on her father's quest to breed the perfect gerbil. Told with heart, humor and affection, The Gerbil Farmer's Daughter is Holly's ode to a weird and wonderful upbringing and her truly one of a kind father.

The Mongolian Gerbil Brain Avraham Mayevsky, 2024-09-10 The Mongolian gerbil brain lies in the anatomy of the blood vessels supplying blood to the brain. In all mammals there is a special mechanism that compensates for the decreased blood flow to the brain in the case of development of stroke. This mechanism is missing in the gerbil and therefore makes the Mongolian gerbil a unique model for stroke. Dr. Mayevsky adopted the gerbil as a model for stroke and his laboratory uniquely studied the mitochondria in the gerbil brain under various pathophysiological conditions. This book describes the history of the Mongolian gerbil in research, the brain energy metabolism and mitochondrial function and brain real time monitoring systems used in gerbils as well as the brain vasculature of the Mongolian gerbil. Further, the book includes chapters on brain multisite recording under brain perturbations, multiparametric responses to brain activation and the effect of neuroprotectants on the gerbil brain. This is an ideal book for research teams researching stroke and epilepsy.
