Breggin,2007-12-17 From the author of *Toxic Psychiatry* and *Talking Back to Prozac* Peter Breggin is the conscience of American psychiatry Once more he updates us on the real evidence with respect to the safety and effectiveness of specific psychiatric medications and ECT This information is needed by all mental health professionals as well as patients and families Bertram Karon Ph D Professor of Psychology Michigan State University Author of *The Psychotherapy of Schizophrenia* Nowhere does false medical thinking do more harm than in the modern psychiatric argument that mental illness is easily diagnosed and then cured by a side effect free drug Nowhere is the correct psychiatric thinking more evident than in the books by Peter Breggin William Glasser MD psychiatrist author of *Reality Therapy* In *Brain Disabling Treatments in Psychiatry* renowned psychiatrist Peter R Breggin M D presents startling scientific research on the dangerous behavioral abnormalities and brain dysfunctions produced by the most widely used and newest psychiatric drugs such as Prozac Paxil Zoloft Cymbalta Effexor Xanax Ativan Ritalin Adderall Concerta Strattera Risperdal Zyprexa Geodon Abilify lithium and Depakote Many of Breggin s earlier findings have improved clinical practice led to legal victories against drug companies and resulted in FDA mandated changes in what the manufacturers must admit about their drugs Yet reliance on these drugs has continued to escalate in the last decade and drug company interests have overwhelmed psychiatric practice This greatly expanded second edition supported by the latest evidence based research shows that psychiatric drugs achieve their primary or essential effect by causing brain dysfunction and that they tend to do far more harm than good New scientific analyses in this completely updated edition include Chapters covering every new antidepressant and stimulant drug Twenty new guidelines for how to conduct non drug therapy A chapter describing how to safely withdraw from psychiatric drugs A discussion of medication spellbinding explaining how patients fail to appreciate their drug induced mental dysfunctions Documentation of how the drug companies control research and the flow of information about psychiatric treatments

Van Hasselt,2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago Indeed at that time relatively little attention was accorded to the psychological needs of older adults The general tenor of the field then was that older adults would not benefit from psychological intervention As we now know this was a faulty assumption that has been discredited with empirical data Indeed clinical research data

adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms. Given the explosion of interest in this area as evinced by increased investigatory activity, national funding and media attention and the increased number of masters and doctoral level courses devoted to this topic, we felt that the time was right for a textbook in the area. Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens. Moreover, since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder, the task for clinicians in the next century will be overwhelming. **Reducing the**

Research Advances in Alcohol and Drug Problems H.M. Annis, H.D. Cappell, F.B. Glaser, M.S. Goodstadt, L.T.

Kozlowski, 2013-11-11 This is the tenth volume in the Research Advances series and the seventh published by Plenum Press. Volume 10 is another omnibus volume providing specialized and advanced reviews in a number of areas related to the use of alcohol, illicit drugs and tobacco. We include also a brief history of the Center for Alcohol Studies that gives Mark Keller's unique perspective on this noted institution. Two of the chapters are decidedly longer than the others; very long chapters have appeared occasionally in the past and we think that it is one of the strengths of the series that we are able to accommodate such reviews. Again, the editorial board has changed. After several years of service, Reginald G. Smart has stepped down. New to the board are Helen M. Annis, Michael S. Goodstadt, Lynn T. Kozlowski and Evelyn R. Vingilis. This is likely to be the sole volume for which Goodstadt is on the board since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies, Rutgers University.
