Geriatrics Syllabus For Specialists:

Geriatrics Syllabus for Specialists, 2002 Geriatric Anesthesiology Jeffrey Silverstein, Alec Rooke, J. G. Reves, Charles H. McLeskey, 2008-04-16 Geriatric anesthesia is a rapidly growing and evolving field and this is the major revision of a classic anesthesia reference. The last few years have seen significant advancements and important new modalities for addressing the needs of an aging population. The editors of this second edition are uniquely situated to put together a text highlighting both essential knowledge and recent breakthroughs of importance to all who work with the elderly. This edition easily maintains the high standard for quality scholarship and useful material set by the first.

Geriatrics for Specialists Andrew G. Lee, Jane F. Potter, G. Michael Harper, 2021-08-31 This book aims to be a single point of reference for advances in the care of geriatric populations across medical and surgical specialties. The aging population is a unique demographic with its own health challenges. Geriatricians are specifically trained to address these challenges but few medical students or residents enter geriatrics even as the demand for geriatric expertise increases. The practices of many medical and surgical specialists are dominated by older patients who may themselves see many specialists but rarely visit geriatricians. This updated edition elucidates the most common medical conditions seen in aging patients and translates approaches to those conditions for physicians across specialties. Divided into three sections that assemble crosscutting issues: medical specialties and surgical and related specialties, this book serves as a guide for clinicians of all backgrounds who will work with older patients as the demographic ages further. This second edition of *Geriatrics for Specialists* expands the number of specialist chapters to reflect growth in research in aging and clinical care for older people in dermatology, plastic surgery, and behavioral neurology. All original chapters from the first edition are extensively revised and updated to reflect the rapid growth of new knowledge in the field.

Geriatrics Review Syllabus Elizabeth L. Cobbs, Edmund H. Duthie, John B. Murphy, 2002 Cardiothoracic Surgery in the Elderly Mark R. Katlic, 2011-05-04 *Cardiothoracic Surgery in the Elderly: Evidence Based Practice* is an important and timely book that reflects the thoughtful work of pioneers in geriatric surgery. It encompasses their knowledge related to geriatric surgery and their reflections and guidance on the rapidly accumulating knowledge related to improving the health and surgical care of seniors. This book provides a scholarly review of the constantly expanding knowledge base about cardiovascular and thoracic surgery in seniors. The book follows a logical sequence covering general aspects of care, cardiac surgery, and thoracic surgery. Chapters are focused on common, devastating, and often missed complications of surgical care in the seniors. These include delirium, depression, pressure sores, functional losses, incontinence, volume depletion, and asymptomatic or atypical complications: myocardial infarction post-operative diarrhea, urinary tract infections, and pneumonia. Each is expertly reviewed. Strategies to help the surgeons and the surgical team anticipate, recognize, and effectively prevent or manage such problems are discussed, and the evidence basis for such strategies is provided. *Cardiothoracic Surgery in the Elderly: Evidence Based Practice* is particularly timely and the first

to review the substantial body of knowledge that has been developed in recent years related to geriatric cardiothoracic surgical problems. It catalogs well the expanding knowledge basis for achieving successful surgical outcomes in the very old. It provides a most useful resource for cardiovascular thoracic surgeons in training and those already in practice.

Principles and Practice of Geriatric Surgery Ronnie Ann Rosenthal, Michael E. Zenilman, Mark R. Katlic, 2011-07-12. In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients. This is a useful book that deserves to do well. I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field. NEJM Book Review

Geriatric Trauma and Acute Care Surgery Aurelio Rodriguez, Robert D. Barraco, Rao R. Ivatury, 2018-03-21. The purpose of this book is to give providers of all levels a simple and essential source of practical information in treating the elderly trauma and emergency surgery patient. The Introduction instructs practitioners how to evaluate and assess risk including frailty and use this information in Goals of Care discussions to facilitate shared decision making so crucial to this population. The individual chapters consist of best practices and care guidelines from some of the most well known thought leaders and best trauma centers in the country across the spectrum from geriatricians to trauma and acute care surgeons and nurses. Each chapter contains easy to read algorithms and references that the readers can use and adapt for their own setting. Chapters on Pre hospital care will help guide EMS organizations and even systems in the right care and triage of the elderly. Each chapter also contains a Nursing Focus section for helpful nursing tips in caring for the elderly with those injuries and problems. These sections make this book a must have for any center looking to improve its care of the elderly patient or just trying to be sure its care is already the best it can be. A special section on Post Acute Care will introduce the provider to the common issues surrounding particular disposition destinations for the elderly patient. This will facilitate discussions with families, case managers and facilities to help improve time to disposition.

Geriatric Rehabilitation Jennifer Bottomley, 2024-06-01. As the aging population continues to increase so does the need for a text specific to the specialized care of the elderly patient as it applies to the physical therapist, assistant student, faculty and clinician. Geriatric Rehabilitation: A Textbook for the Physical Therapist Assistant recognizes the growing role of the PTA in a variety of health care settings from acute to home to long term care settings to name a few. Inside Geriatric Rehabilitation Dr. Jennifer Bottomley along with her contributors focuses on the clinically relevant assessment, treatment and management of the geriatric population. Pathological manifestations commonly seen in the elderly patient are addressed from a systems perspective as well as a focus on what is seen clinically and how it affects function. Each pathological area covered includes Screening, assessment and evaluation, Treatment, prescription, Goal setting, Modification of

treatment Anticipated outcomes Psychosocial pharmacological and nutritional elements The organization and presentation of the practical hands on components of interventions assessments and decision making skills make this a go to text for the PTA to administer comprehensive geriatric care at each point along the continuum of care Some of the features inside include Emphasis on treatment interventions techniques tips and options Focus on how assessment tools and treatments are applied and modified to benefit the geriatric population and what the expected outcomes are Clear and outlined chapter objectives User friendly summary tables in the nutritional and pharmacology chapters Pearls that highlight important chapter information Appendices and study aids Geriatric Rehabilitation A Textbook for the Physical Therapist Assistant answers the call for a text that focuses on the management of geriatric patients across the spectrum of care for the PTA from students to those practicing in geriatric populations **Penn Clinical Manual of Urology , E-Book** Thomas J.
